Pulsus conferences insist participants from all over the world clock in “3rd International Conference on Women’s Health Nursing” during February 11-12, 2022, Paris France. The theme of the conference this year is “Pioneering Spirit of Enriching the Lives and Wellness of Women” which guarantees an outstanding science program supporting many esteemed speakers who are tormented by intuition.

Through providing access to ongoing training and networking opportunities, the conference aims to improve the practice of advancing the profession for the benefit of the people and the individual patients they represent.

A women’s health nurse practitioner is a nurse practitioner that specializes in continuing and comprehensive healthcare for women across the lifespan with emphasis on conditions unique to women from menarche through the remainder of their life cycle.

Regards
Women’s Health Nursing 2022
Organizing Committee

“France Healthcare Outlook Report, 2020,” report provides comprehensive insights about healthcare scenario, regulatory policies and reimbursement landscape in France. The report also identifies key trends in the healthcare market and provides insights into the demographic and healthcare infrastructure of the country. Along with this the report also provides a brief look into the trends and segmentation of the pharmaceutical and medical devices market of France.

France has 2,694 healthcare establishments, including 35% public, 39% private and 26% private non-profit, 655 hospital facilities for emergency treatment, 494 of which are public 331 telemedicine projects (renal or heart failure, chronic wounds, diabetes, etc.).

France is a leader in the field. Advances in healthcare are driven by original, innovative, high-quality biomedical research and its rapid application to diagnostics, treatment, healthcare and public health.
