

## **New advanced technology in medicine by bio electron's photons special circuit**

**Nick Kostovic**, Kostovic Acupuncture by bio Electron's Laser, Corp, USA

### **Abstract**

The K-BTE device simply releases bio electrons photons. Enriched by natural acids, these bio electrons photons become capable of dissolving unhealthy particles in fiber tissue. It means number of sick particles, dead cells and oxidized proteins will be dissolved from fiber tissue without harm to the healthy cells. This dissolving and dispersing of extreme bad and dangerous unhealthy particles can operate in the brain or any other physical organ. In the brain, any kind of neurological disorders can be checked searching for deep painfully affected areas and then reversed by enriched bio electron photons. The same healing capability occurs identically in an atrophied muscle, bone and cartilage tissue. It also works for plaque in the entire vascular system by dispersing and healing. The ever present keynote of the K-BTE device is always the lack of harm to healthy cells. The K-BTE device attracts and transfers light of sun quanta particles consisting by its structure of element concentric rings which are consisted by bio-chemical charges of bio photons and electron neutrinos penetrating directly into the brain. This light injection fosters the regeneration, recovery and re-growth of neurons in the brain. This enlightening process facilitates the brain tissue to regain its ability to send impulses throughout the body while simultaneously improving mobility and homeostasis.

### **Biography**

Nick Kostovic graduated from Split Gymnasium in 1969 with an Associate of Arts Degree in Humanities and Science. My father, Ivo Kostovic, was employed by the former country ex-Yugoslavia and also he was collaborating the former country ex-Soviet Union in the field of Military Diplomacy in Stalin era. With that background he was able to provide me with the basic knowledge enabling me to proceed forward. Both my parents gleaned a basic knowledge of energetic medicine from studying my great grand Uncle Nikola Tesla's research papers and other secret Nazi documents. I decided to follow in their footsteps, personally funded, I have independently continued my journey of research to this very day.
