## Conference Sessions:

All honorable authors, researchers, scientists and students are encouraged to contribute and help the shape of the conference through submissions of their posters & research abstracts. Also, high quality research contributions describing original and unpublished of conceptual, constructive, experimental or theoretical work in all areas of Dermatology and Skin diseases are warmly invited for presentations at the conference. The conference memorial contributions of abstracts and posters that address themes & future aspects of the conference related sessions.

- Aesthetic Medicine
- Dermatology
- Cosmetology
- Plastic Surgery
- Reconstructive surgery
- Dermatological Diseases
- Skin Rejuvenation and Facial Rejuvenation
- Breast augmentation
- Abdominoplasty
- Bariatric surgery and Rhinoplasty
- Dermatological Procedures
- Hair transplantation
- New Trends by Aesthetic Therapies
- Cosmeceuticals
- Dermatopathology
- Trichology
- Current research in Dermatology
- Aesthetic Medicine and cosmetology
- Surgical and non- surgical Aesthetic treatment
- Case reports in dermatology
- Aesthetic Medicine and Cosmetology
- Dermatological Infections
- Skin Cancer
- Surgical Dermatology

# Program at Glance

## December 09, 2019

Time	Session
------	---------

08:00 - 09:00 Registration

09:00 - 09:15 Inaugural Address

09:15 - 10:45 Keynote Session

Group Photo

10:50 - 11:00 Coffee/Tea Break

11:00 - 13:00 Aesthetic Medicine | Dermatology | Cosmetology | Plastic Surgery

13:00 - 13:30 Lunch Break

13:30 - 15:30 Reconstructive surgery | Dermatological Diseases | Skin Rejuvenation and Facial Rejuvenation | Breast augmentation, Abdominoplasty, Bariatric surgery and Rhinoplasty

15:30 - 15:45 Coffee/Tea Break

15:45 - 17:30 Dermatological Procedures | New Trends by Aesthetic Therapies | Cosmeceuticals | Dermatopathology

Day Concludes

## December 10, 2019

Time	Session
------	---------

09:00 - 10:00 Keynote Sessions

10:00 - 10:15 Coffee/Tea Break

10:15 - 13:00 Trichology | Current research in Dermatology, Aesthetic Medicine and cosmetology | Surgical and non- surgical Aesthetic treatment | Case reports in dermatology, Aesthetic Medicine and Cosmetology

13:00 - 13:30 Lunch Break

13:30 - 15:30 Dermatological Infections | Skin Cancer | Surgical Dermatology | Hair transplantation

15:30 - 15:45 Coffee/Tea Break

15:45 - 17:30 Poster Session

Day Concludes

Award Ceremony

Conferece Concludes

**Title: Interaction of skin to fractional picosecond laser in Asian**

**Hye-Jin Ahn**, Kyung Hee University, South Korea

**Abstract:** Picosecond laser accepted by FDA for tattoo removal and pigment at first. By aid of micro lens array (MLA), more focused laser beam irradiation could be irradiate on the skin. Therefore, the purpose of laser application is widen to scar, and rejuvenation. In this study, we evaluated the fractionated picosecond laser to skin interaction in subjects of Fitzpatrick skin type III and IV.

**Title: Periocular Rejuvenation- Techniques and avoiding complications**

**Edwin Yuen**, University of California San Francisco, USA

**Abstract:** Techniques to improve the periocular area with hyaluronic acid will be discussed including choosing the right patient, injection technique, potential complications and how to prevent them.

**Title: A Case of Lupus Erythematosus with Concomitant Hansen's Disease**

**Anna C Tankeh**, University of Santo Tomas, Philippines

**Abstract:** We describe a case of a 27-year old female who presented with a two month history of painful nodules on both lower extremities. Impression at another institution was Erythema Nodosum. Patient was given Prednisone (0.5mg/kg of body weight) with potent topical steroids. Two weeks later the patient developed high grade fever and appearance of multiple erythematous papules, plaques and painful nodules over the face and both upper and lower extremities that led to her admission. Skin punch biopsy was done. The histopathologic diagnosis was Tumid Lupus Erythematosus.

**Title: Work shop**

**Muhammad Amin Baig**, Chairman International Alternative Medical Council (IAMC), Pakistan

**Abstract:** 250 patients were randomly selected having no previous physical injury, between age 18-80 years. Wet cupping sessions were done on every alternate day, 3 sessions were done in which removal of subcutaneous blood with the help of Glass suction cups was done after making superficial incisions. One cup was generally applied Between shoulders at T1 and C7 vertebrae area, and Two Cups were applied on L3-L4 or L4-L5 and L5-S1 vertebrae.

**Title: Intense pulsed light and the treatment of spots, wrinkles, texture, pores, UV spots, brown marks and porphyrin levels**

**Sunil Chopra**, The London Dermatology Centre, UK

**Abstract:** A case-based analysis of nine patients who underwent treatment for rosacea was conducted to assess whether IPL treatment can affect other parameters such as spots, wrinkles, texture, pores, UV spots, brown marks and porphyrin levels. The IPL treatment regimen consisted of three to six sessions. Facial analysis software (Visia) was used to procure digital photographs and parameter data of patients before and after treatment. The Wilcoxon signed rank test was utilised to validate the observed outcomes ( $W_{stat} = 0, W_{crit} = 0$ ).

**Title: Formulation studies of cosmetic foundation containing volatile oil from *Thymus vulgaris***

**Jana Mae B. De Vera**, Adamson University, College of Pharmacy, Philippines

**Abstract:** These days the market is the center of assorted commercially available cosmetic products. One of them is the facial foundation, containing various compounds both from natural and synthetic sources. This study explores and utilize anti-microbial potential of the plant *Thymus vulgaris* or Thyme. *Thymus vulgaris* is a very important medicinal plants, it should be highly recommended for a variety of therapeutic properties of their essential purpose, normally known as Thyme oil and it has been proven to have an anti-bacterial activity against acne causing bacteria such as *Staphylococcus aureus*.

**Title: A Rare Presentation of CD30 Negative Mycosis Fungoides Mimicking Erythema Nodosum Leprosum in a 68-Year Old Filipino Male**

**Ma. Cristina Georgina T. Paloma**, Dr. Jose N. Rodriguez Memorial Hospital, Philippines

**Abstract:** Mycosis Fungoides is a type of primary cutaneous lymphoma of T-cell origin. It generally begins as erythematous patches and plaques before progressing to the tumor stage. It can be similar in presentation to a multitude of other cutaneous conditions making it difficult to diagnose early in the course. Multiple biopsies are often needed before a definite diagnosis can be reached. A 68-year old male presented with a 13-year history of multiple erythematous patches and plaques on the arms and trunk. Lesions were pruritic and chronically relapsing over the years, temporarily relieved by topical corticosteroids.

**Title: A Rare Cutaneous Condition: Reticular Erythematous Mucinosi s in a 70 year-old female**

**Marianne G. Panlilio**, Dr. Jose N. Rodriguez Memorial Hospital, Philippines

**Abstract:** Reticular Erythematous Mucinosi s (REM) is a rare disorder and may impose a challenge in diagnosing and giving appropriate management to any practicing dermatologists. Up until present, the exact etiology and pathogenesis of REM remain unknown. There are different opposing school of thoughts with respect to its association with systemic lupus erythematosus. However, some believes that REM has multiple associations with different diseases and its triggers were already identified.

**Title: Novel psoriasis therapeutics: examining the anti-inflammatory utility of anti-anxiolytic medications**

**Sheida Naderi-Azad**, University of Toronto Medical School, ON, Canada

**Abstract:** Statement of the Problem: Psoriasis is a debilitating autoimmune disease defined by erythematous, pruritic, and scaly plaques. Yet, this disease also has numerous extracutaneous associations including depression, heart disease, arthritis, and inflammatory bowel disease. The combination of physical and mental manifestations of psoriasis can be explained, respectively, by inflammatory cytokines that act on skin cells to create scaly patches and brain cells to alter one's mental state.

# City Attractions

# Venue

Bangkok is also called as “Krung Thep” which implies “City of Angels” and is a famous tourist destination, visited by a large number of guests from all around the world. The city is the well-known tourist spot of entire East Asia and represents a mix of tradition and modernity. Guests will appreciate its advanced skyscrapers, luxury hotels, and shopping malls, alongside the traditional Thai culture that still retains its own charm.

There are a lot of things to see and do in Bangkok; the city has impressive temples, galleries, showcases, shopping centers, various bars, night club, and cinemas and also, there are numerous cultural attractions, for example, national museums, the Siam Society, the Thailand Cultural Center, and the National Library. One of the most famous destinations is the floating market of Damnoen Saduak. It’s where Visitors can taste local food, while an expert guide takes on a boat ride along the canals where visitors can purchase huge amounts of souvenirs for loved ones. Bangkok is a heaven for shopping lovers.
