Chemical and Biochemical Engineering

September 17-18, 2018 Hong Kong

Theme:
“Evolution of Chemical Engineering: Back to the Future”
Invitation...

Dear Colleagues,

Conference Series LLC Ltd. extends its welcome to 6th Asia Pacific Congress on chemical and Biochemical Engineering during September 17-18, 2018 Hong Kong. Conference Series LLC Ltd. organizes a conference series of 3000+ Global Events with over 1000+ Conferences, 1000+ Symposia and 1000+ Workshops in USA, Europe, Middle East & Asia Pacific with support from 1000 more scientific societies and publishes 700+ Open access journals which contains over 30000 eminent personalities, reputed scientists as editorial board members. Theme of the conference “Evolution of Chemical Engineering: Back to the Future” is designed in such a way to mainly focus on Chemical and Biochemical Engineering, it is now being extensively used in Health and Industrial sectors. We hope Asia Chemical Engineering 2018 is the best platform to discuss the basic principles involved in the development of Traditional Industrial technologies and Research. As this conference deals with the basics concepts, students, delegates, academicians and business people can attend the conference to root up the knowledge and excel in this field. Conference will focus on the following topics during presentations of the two-day event, which reflect current education research, developments and innovations..

- Recent development in Catalysis
- Advances in Chemical Technology
- Advanced Surface Chemistry
- Major challenges of Chemical Reaction Engineering
- Trends in Biochemical Engineering
- Agrochemicals
- Reservoir Engineering
- Heat Transfer Research Opportunities
- New approaches to mass transfer
- Chemical Engineering Thermodynamics
- Development in Food Technology
- Modeling and Simulation
- Petroleum and Petrochemicals research
- Major challenges of Nano Technology
- Current Advances of Industrial Separation Techniques
- Water Science and Technology Advancement
- Chemical Process safety and Hazards
- Hydrogen Production Research

Tourist Attractions
Hong Kong is a Special Administrative Region of China, it is situated on the southeast coast of China. The city is one of the world’s leading financial, banking and trading centers. It is made up of four parts: Hong Kong Island, Kowloon Peninsula, the New Territories and the Outlying Islands. The prosperous island is the center of economy, politics, entertainment and shopping with its southern part noted for sea shores and bays. Kowloon is another flourishing part where Tsim Sha Tsui, Yau Ma Tei and Mong Kok are the most popular destinations. The New Territories and Outlying Islands are ideal places to experience a peaceful and natural holiday.

Hong Kong serves as an important transport hub between international cities and regions with major cities in Mainland China. The well-developed urban transport system can be used to most places in the city, making traveling convenient and cheap. Different cultures bring food all over the world to this city, so it is a paradise for foodies. After a busy day of traveling, it is highly recommended to appreciate the colorful nightlife. An open city with a wonderful natural harbour, it is a place where various cultures blend harmoniously. British culture can be found everywhere because of former colonial rule, while it also preserves traditional customs and the core values of Confucianism that have faded in Mainland China. It is the backdrop for modern movies and pop music that enjoy worldwide recognition.

Venue:
Harbour Plaza Resort City
18 Tin Yan Road, Tin Shui Wai
100069, New Territories, Hong Kong
