# Invitation

Dear Colleagues,

Conference Series Ltd invites all the participants from all over the world to attend “**International Conference on Autism**” which includes prompt keynote presentations, Oral talks, Poster presentations and Exhibitions. Autism conference will be around the theme: “**Understanding Autistic Mind and Accelerating the Recovery**”. Autism is a neurodevelopment disorder. It is a mental condition, persisting from early childhood characterized by difficulty in communicating, inability to form relationships and unusual behavior patterns. Autism continues in adulthood but is muted. The various genetic, environmental, teratogenic, immunization factors may be the causes of Autism .About 1 percent of the world’s population is having Autism. More than 3.5 million Americans live with an autism spectrum disorder i.e. 1 in 68 births are autistic. Autism services cost U.S. citizens \$236-262 billion annually.

With Regards,

**Autism 2019**

## Exhibition and Sponsorship

An Exhibition will be held concurrently with the Conference. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Autism Care.

## About Brussels, Belgium

The city of Brussels being the official capital of Belgium is also the most densely populated and richest region in whole Belgium. Belgium is situated in Western Europe and is surrounded by France, Germany, Netherlands, Luxembourg and the North Sea. The city of Brussels has evolved many times but till date one can find the intact old city walls. Since ancient times it has been famous for its trade hub, crafts and of course the Kings of Belgium.

The interesting fact about Belgium is that people do not share a common language. There are three official languages in Belgium namely French, Dutch and German. Although in Brussels most of the people speak French. Chocolates, beer and waffles are the main economy raiser of Belgium though there are many other commodities that increase the economy.

History of Belgium and Brain could be dated back to 16th century and the first study on human brain was performed by Andreas Vesalius. After that Arthur Van Gehuchten, most famous Belgian neurologist, pioneered in the anatomy and pathology of the nervous system. Together with Ramon y Cajal, they named the extensor plantar reflex as "Babinski sign". Recent advancements in neurology witnessed that Belgian neurologists have always been actively working being a part of the European neurological society.

European Union has its headquarters in Brussels and after that it has become a hub for government activities. The European Parliament, NATO and the European Commission operate from Brussels. The quarterly summit of the European council is also held here
