

SPONSORSHIP OPPORTUNITIES

A photograph of a busy conference floor. In the foreground, a man with glasses and a yellow lanyard is talking to a woman. Other attendees are visible in the background, some wearing lanyards and holding drinks.

**10th International Conference on
Bacteriology and Infectious
Diseases**

October 26-27, 2020 | Cape Town, South Africa

our DELEGATE
is your CLIENT

Our Programme

Our programme aims to bridge the gap between basic and translation science, with an emphasis on large scale approaches and innovative technologies in the fields of oncology, cardiovascular, biomarkers, Clinical research and trial. We foster discussion and debate of the innovations by maximizing interactions collaborations and networking opportunities for clinical researchers, scientists, doctors, students and delegates.

5+ Keynote Sessions

10+ Scientific Sessions

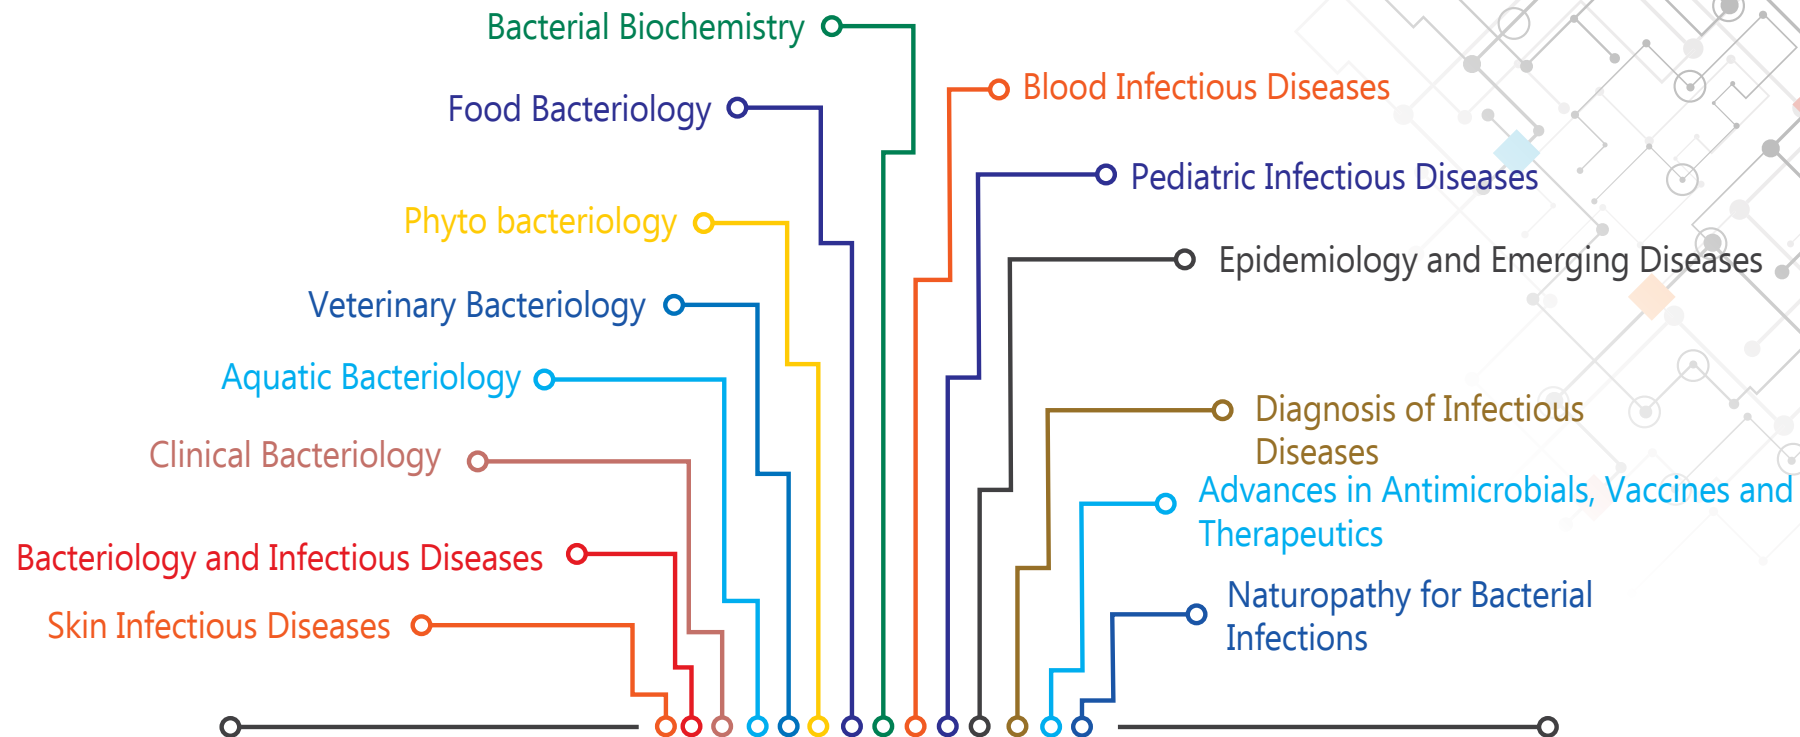

Workshops and
Special Sessions

40+ Oral
Presentations

25+ Poster
Presentations

Young
Researchers
Forum

Conference Sessions

BACTERIOLOGY 2020

Venue & Hospitality

Cape Town is one of South Africa's most historically important cities. It was here, in the Mother City, where the first European colonists set foot in South Africa—which also marked the beginning of the South African slave trade. It was home to perhaps the world's most famous political prisoner—Nelson Mandela—who was held on the tiny Robben Island in Table Bay. Here are a few of the landmark historical moments that make Cape Town the place it is today. Roughly 300 million years ago, during the Karoo Ice Age, Table Mountain wasn't a mountain at all. It was at sea level—but what lay beneath was layers of sandstone set atop a granite base. Pressure from the underlying magma worked with the ice to harden the top layer, leaving the iconic flat slab we see today. As the continents tore apart and collided, the city's famous landmark was gradually forced to rise and it now stands a kilometre tall overlooking the bay. Would you believe the Table Mountain Aerial Cableway is nearly a century old? Before then, the only way up the mountain was by foot and only the most adventurous—or foolhardy—had been to its summit. On 4 October 1929, after two years of difficult and dangerous work, the first Cable Car chugged its way to the top filled with excited and probably very nervous visitors. It's been upgraded a number of times since, and today the trip to the top is smooth sailing. Table Mountain and the surrounding area was home to the Khoisan people long before the first Europeans arrived. They called the city //Hui !Gaeb, and they were skilled and industrious people with an unmatched knowledge of the local fauna and flora. They also gave Table Mountain its first name: Hoerikwaggo, or “Mountain in the sea”.

our DELEGATE is your CLIENT

Exhibitors and sponsors have the opportunity for face-to-face networking with leading scientists and clinicians, increase brand awareness, and develop collaborations with an international audience.

In 2018-2019, the top ten countries represented by our delegates were: United States, United Kingdom, Germany, Netherlands, Belgium, Sweden, Canada, France, Switzerland, Japan and Spain
