

Scientific Agenda

12th World Congress on
Breast Cancer Research & Therapies

May 23, 2022 | GMT Timings

Theme: "Visualizing the novel diagnostic approaches of Breast Cancer"

GMT Time	Name	Title
Keynote Presentation		
09:00 AM	Tong Li , The University of Sydney, Australia	A systematic review and meta-analysis of differential detection by breast density for 3D mammography and 2D mammography in population-based breast screening
09:30 AM	Xiao-Xia Yin , University of Guangzhou, China	MRI radiogenomics for intelligent diagnosis of breast tumors and accurate prediction of neoadjuvant chemotherapy responses.
Oral Presentation		
10:00 AM	Nandini N.M , JSSAHER, India	Prognostic factors and their interrelationship in breast cancer.
10:30 AM	Ines Barone , University Of Calabria, Italy	Obesity and Endocrine Resistance in Breast Cancer: Epidemiological Evidence and Proposed Mechanisms
Keynote Presentation		
11:00 AM	Michael Retsky , University College London, UK	Breast cancer and the perioperative window
Oral Presentation		
11:30 AM	Cinzia Giordano , University Of Calabria, Italy	The Biology of Extracellular vesicles in Breast Cancer Progression and Therapy resistance
Poster Presentation		
12:00 PM	Katarzyna Steinhof-Radwańska , Silesian Medical University Poland	Can contrast-enhanced spectral mammography (CESM) reduce the number of unnecessary breast biopsies? Analysis of 593 cases of patients with suspected breast cancer
12:20 PM	Andrzej Lorek , Silesian Medical University, Poland	The usefulness of contrast-enhanced spectral mammography in surgical planning of Breast Cancer treatment
12:40 PM	Katarzyna Steinhof-Radwańska , Silesian Medical University Poland	Contrast-enhanced spectral mammography in Radiological Assessment of Response to Neoadjuvant Chemotherapy in Breast Cancer.
Video Presentation		
13:10 PM	Shannon Williamson-Butler , University of North Texas, USA	Effects of survivorship care planning on patient-provider discussions among women ending breast cancer treatment
