About City

Toronto is the most populous city in Canada. In the 2011 census, Toronto had a population of 2,615,060, making it the fifth largest city in North America. A population estimate from a city report released in 2013 shows the city is now the fourth most populous city in North America, after Mexico City, New York City, and Los Angeles. An established global city, Toronto is an international centre of business, finance, arts, and culture, and widely recognized as one of the most multicultural and cosmopolitan cities in the world. Toronto, the capital of the province of Ontario, is a major Canadian city along Lake Ontario's north-western shore. It's a dynamic metropolis with a core of soaring skyscrapers, all dwarfed by the iconic CN Tower. Toronto also has many green spaces, from the orderly oval of Queen's Park to 400-acre High Park and its trails, sports facilities and zoo.
