Best Poster Award

- You will be given about 5-7 minutes to present your poster including questions and answers. Judges may pose questions during the evaluation of the poster.
- Judges will even evaluate the student’s enthusiasm towards their study, interest and knowledge in the area of their research.
- The winners will be announced at the closing ceremony of the conference. The decision of the winner will be withdrawn if the winner/winners is/are not present at the time of announcement.
- Apart from the judging time you may also be present at the poster to share your research with interested delegates.

Young Researchers Forum

- Present your research through oral presentations.
- Learn about career development and the latest research tools and technologies in your field.
- This forum will give pertinent and timely information to those who conduct research and those who use and benefit from research.
- Develop a foundation for collaboration among young researchers.
- The forum will provide an opportunity for collegial interaction with other young investigators and established senior investigators across the globe.
- Interact and share ideas with both peers and mentors.

Berlin Germany is a combination of timeless tradition and cutting-edge cool, wrapped up in a package of spectacular landscapes, architectural masterpieces, idyllic half-timbered villages and vibrant metropolises and fairy-tale palaces.

Berlin has grown-up increasingly but it hasn’t surrendered its contagious energy and indie spirit. Berlin spoils visitors with quirky and classic diversions. There’s haute cuisine in an ex-brewery, world-class art in a WWII bunker, all-night parties in power stations and the chance to chill in a river barge-turned-swimming pool. Buildings marking milestones in history – the Reichstag, the Brandenburg Gate and Checkpoint Charlie among them – rub shoulders with 175 museums, including such top acts as the Pergamonmuseum, with its monumental antiquities, and the Hamburger Bahnhof, which boasts bold contemporary art. Sweeping views unfold from the TV Tower and the Reichstag Dome, while down below, tourist boats glide past the Nikolaiviertel, the site of Berlin’s medieval beginnings.

The history of science in Berlin is full of the names of famous scholars like Humboldt, Einstein, Virchow, Koch, Meitner and Planck. Major national research organizations such as Fraunhofer, the Helmholtz Association and the Leibniz Association are represented in Berlin by various institutions and research sites. Germany’s largest concentration of universities and colleges is located in Berlin, a leading center of science, academics, and research, not least thanks to its 39 institutions of higher education. Germany’s national research organizations are represented in Berlin with a number of institutes, as are eight federal ministry research facilities. Together with Berlin’s universities, nearly 100 research institutions in the city form an important basis for the region’s economic development.
