As the ancient capital from 1200 years ago, the Japanese see Kyoto as the cultural heart of the country. The beautiful surroundings and the cultural heritage attract people from all over the world. Visitors are entranced by the charms of the city and the vibrant sites and sounds of traditional Japan.

Kyoto is a sophisticated blend of the ancient and the modern, an urban environment where museums, four star restaurants and active entertainment venues flourish alongside temples, small shops and quiet neighbourhoods.

Less crowded than other cities in Asia, and having a lower cost of living than Tokyo, Kyoto assures an ideal living and creative environment.

This centre of innovation has a reputation for fostering leading research and the development of high technology firms. Kyoto has the highest percentage of academics per capita in Japan with over 40 universities and 50 research organizations. Most of Japan's Nobel Prizes have been awarded to researchers from Kyoto University.
