Japan known as " Land of Rising Sun" is an arcipelago consisting of islands around eastern coast of Asia. Japan is a sovereign island country in East Asia. Situated in the Pacific Ocean, it lies off the eastern bank of the Asian terrain, and extends from the Sea of Okhotsk in the north toward the East China Sea and Taiwan in the southwest. The atmosphere of Japan is overwhelmingly temperate, yet shifts incredibly from north to south. Japan's topographical highlights separate it into six central climatic zones. In the Sea of Japan zone on Honshu's west Coast, northwest winter winds bring heavy snowfall. In the late spring, the locale is cooler than the Pacific region, however it in some cases encounters to a great degree hot temperature as a result of the foehn. Japan, rich as it is in both standard culture and specialized improvement attracted 19.73 million worldwide tourists in 2015 and expanded by 21.8% to attracted 24.03 million global visitors in 2016. Tourism from abroad is one of the few promising businesses in Japan. For inbound tourism, Japan was positioned sixteenth on the world in 2015.
