Yokohama, a Japanese city south of Tokyo, was one of the first Japanese ports opened to foreign trade, in 1859. It contains a large Chinatown with hundreds of Chinese restaurants and shops. It's also known for Sankei-en Garden, a botanical park containing preserved Japanese residences from different eras, and the seaside Minato Mirai district, site of the 296m Landmark Tower.

Yokohama's population of 3.7 million makes it Japan's largest city after the special wards of Tokyo. Yokohama developed rapidly as Japan's prominent port city following the end of Japan's relative isolation in the mid-19th century and is today one of its major ports along with Kobe, Osaka, Nagoya, Hakata, Tokyo, and China.

Yokohama features a humid subtropical climate with hot and humid summers and chilly winters. Weather-wise, Yokohama has a mixed bag of rain, clouds and sun, although in winter, it is surprisingly sunny, more so than Southern Spain.
