B2B Meetings

Venue

Yokohama, Japan

Important Dates

Abstract Submission opens: May 01, 2019

Registration opens: May 01, 2019

Early bird registration: July 28, 2019

On spot registration: December 09, 2019

Accommodation

A large number of rooms have been reserved. Discounted room rates for Dental Meeting 2019 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Conference. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Alternative and Traditional Medicine.

About Yokohama

Yokohama is the second largest city in Japan by population, and the most populous municipality of Japan. It is the capital city of Kanagawa Prefecture. It lies on Tokyo Bay, south of Tokyo, in the Kantō region of the main island of Honshu. It is a major commercial hub of the Greater Tokyo Area. Yokohama's population of 3.7 million makes it Japan's largest city. Yokohama developed rapidly as Japan's prominent port city following the end of Japan's relative isolation in the mid-19th century, and is today one of its major ports along with Kobe, Osaka, Nagoya, Hakata, Tokyo, and Chiba. Yokohama literally means "horizontal beach". The current area surrounded by Maita Park, the Ōoka River and the Nakamura River had been a gulf divided by a sandbar from the open sea. This sandbar was the original Yokohama fishing village. Since the sandbar protruded perpendicularly from the land, or horizontally when viewed from the sea, it was called a "horizontal beach". In Yokohama, the climate is temperate, with fairly mild and sunny winters, and hot, humid and rainy summers. Like the rest of Japan, the city is affected by the monsoon circulation: in winter the northwest cold currents will prevail, while in summer they will be replaced by hot and humid currents of tropical origin.
