Award Ceremony

Conferece Concludes

City Attractions

Venue :

Osaka, Japan

Osaka is Japan's second largest metropolitan city after Tokyo. It is located in the humid subtropical climate zone with four distinct seasons. Its wintertime is generally mild, the flower fields offer a wide variation of flowers in the month of May however, and the region is most famous for its lavender which fascinates large numbers of visitors every summer, when the plants are in full bloom. In starting of spring season it is mild, but ends up being hot and humid. Greater Osaka has a broad network of railway lines, similar to that of Greater Tokyo. Osaka is served by two airports outside of the city, Kansai International Airport which handles primarily international passenger flights and Osaka International Airport which handles mostly domestic services and some international cargo flights.
