Program Announcement

Venue
Osaka, Japan

Important Dates
Abstract Submission Deadline: September 25, 2018
Early Bird Registration: December 15, 2018
Registration Closes: March 01, 2019
On Spot Registration: March 27, 2019

Accommodation
A large number of rooms have been reserved. Discounted room rates for Diabetes Asia Pacific 2019 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship
An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the field of Ethnomedicine and Ethnopharmacology.

About Osaka, Japan
Japan is a world apart – a cultural Galapagos where a unique civilization blossomed, and today thrives in contrasts of traditional and modern. The Japanese spirit is strong, warm and incredibly welcoming. Japan is a leading nation in scientific research, particularly technology, machinery and biomedical research. Japan leads the world in robotics production.

Osaka is the world’s 3rd safest city, second largest metropolitan area in Japan and among the largest in the world with over 19 million inhabitants. Osaka has served as the capital of Japan for centuries, been a port of entry for international exchange. In more modern times, it has been a bastion of commerce and finance, and played a major role in Japan’s industrial and economic development. Osaka has a plethora of tourism resources to note a cityscape that has given it the name of a Aqua metropolis. Easily accessible from within Japan and abroad by multimodal transportation networks that feature Japan’s only 24-hour airport in the Kansai International Airport, Osaka welcomes around 210 million visitors every year for business, pleasure or what have you.

The Osaka-Umeda terminal is used by an average of around 2.5 million people each day. “Grand Front Osaka” was opened in April 2013 as a new “town” at the gateway to Osaka. It has the greatest number of manufacturing establishments in Japan with 18,229 companies. It is an area where the artisan spirit lives on, with more than 60% of industrial production in small and medium-sized enterprises that take the top share globally. It forms an essential industrial base (supporting industry) for the development of new growth sectors and cutting-edge products.
