6TH INTERNATIONAL CONFERENCE ON

EPIDEMIOLOGY & PUBLIC HEALTH

OCTOBER 23-25, 2017 | PARIS, FRANCE

SPEAKER GUIDELINES
Encyclopedia of Bioanalytical Methods for Bioavailability and Bioequivalence Studies of Pharmaceuticals (E-BABE): It is a unique encyclopedia involving bioanalytical methods for bioavailability and bioequivalence (BA/BE) studies of pharmaceuticals for suitable method selection with thousands of combinations and searches against these methods. Most scrutinized literature was collected from different sources including PubMed. This database has been curated using published methods for all most all pharmaceuticals. Required information for regular method development/validation such as IUPAC name, structure, solubility, chromatographic conditions, instrumentation information like HPLC, LCMS detection parameters, sample preparations, recovery details, limit of detection and limit of quantification, Tmax, Cmax etc., for routine application in BA/BE studies of pharmaceuticals was incorporated including official pharmacopeias information such as European Pharmacopeia, Japan Pharmacopeia and US Pharmacopeia. Database includes drug based bioanalytical methods covering most required fields and external database links of important drug portals such as drug bank, Rxlist, MEDLINE plus, KEGG Drug ID, KEGG Compound ID, Merck manual, PubChem compound ID, PubChem substance ID and USFDA. Searching/querying the database is through drug name, chemical formula or structural search by smiles format. Keen selections of bioanalytical methods for pharmaceutical analysis or regular quality control are also possible with E-BABE. E-BABE was built understanding the needs of pharmaceutical industry and laboratories including CROs working on BA/BE studies. Presently it has nearly of 5,000 methods and it will be updated regularly. (Up to 250 words)
Biography

XXXX has completed his PhD at the age of 25 years from Andhra University and postdoctoral studies from Stanford University School of Medicine. He is the director of XXXX, a premier Bio-Soft service organization. He has published more than 25 papers in reputed journals and has been serving as an editorial board member of repute. (Up to 100 words)

Category: (Oral presentation/ Poster presentation)

Standards and Guidelines for Speakers and Moderators

Conference Series Ltd is pleased to welcome you as a presenter at Epidemiology 2017. High-quality presentations are essential for the success of Epidemiology 2017. To help you plan your presentation for Epidemiology 2017, please find in this document important information about the audiovisual equipment available in the meeting rooms, along with guidelines to help you prepare and deliver your presentation.

These standards and guidelines are intended to provide guidance to speakers and moderators at events conducted by Conferenceseries Ltd, UK. The Epidemiology 2017 desires that speakers and moderators:

- Have a significant knowledge and expertise of the subject area;
- Have sufficient presentation skills to effectively communicate
- Do not engage in excessive commercial presentations of their organization;
- Be conscious of the time limitation of their presentation;

Note the recommendations (below) for preparation of PowerPoint presentations; and understand that materials provided for Conference Series event become the property of Conferenceseries Ltd, UK.

THE SETTING:

All meeting rooms for any of the conference main tracks, as well as for any workshop, symposium and technical briefing, are equipped with:
• One screen
• One electronic data projector
• One laptop computer

SPEAKER STANDARDS:

1. **Knowledge of the subject.** Speakers shall have both in-depth and broad knowledge of the presented subject, going beyond their personal experience or the experience of their organization or firm. This will help provide examples for participants that illustrate various points of view or methods of doing things, and allow more complete responses to questions. It is also valuable to incorporate a global perspective whenever possible on the topic of discussion.

2. **Presentation skills.** Speakers shall understand how to address and teach adults. This includes, at a minimum, good voice projection, coordination of oral and visual information, ability to interact positively with the audience, and ability to synthesize information into understandable segments and present them in an orderly and logical manner. One should avoid reading material from the slide presentation. Slide material should touch on key points of the presentation. Presentation skills will be a major factor used by NCPPP staff and committees when recruiting speakers. In addition, NCPPP allows only one speaker from any given organization to speak on a panel, and not more than two speakers from the same organization to participate in a single program.

SPEAKER GUIDELINES:

1. **Language:**
   Presentations as well as all audio visual material should be presented in English (slides, DVDs ...)

2. **General instructions**
   All presentations are held in **Microsoft PowerPoint on a PC running Windows.** If you are using other software than Microsoft PowerPoint on a PC running Windows (example: Open Office, PowerPoint for Mac, Keynote) please make sure your presentation is converted to Microsoft PowerPoint for Windows PCs before you travel to the congress (preferably by trying the converted presentation on a Windows PC).

   **Presentations in Acrobat PDF format or Word format are not accepted.**
Speakers are kindly requested to respect the allotted time to guarantee a smooth running of the sessions. Computer projection will be available. Neither slide (35mm) projections nor personal laptops (MAC and PC) will be used in the congress rooms. A single computerized system will manage all projections and will send the presentations to the assigned congress rooms automatically. This method guarantees an easier management, a higher quality of projection and a quicker and smoother running of the presentations. The use of personal laptops (MAC and PC) for presentations will not be allowed.

In the conference session rooms our organizers help the speaker to transfer his or her presentation into laptop from where the presentations would be projected before the start of the session with the support of moderator or session chairs.

3 Technical instructions:
During the congress, presentations will run on PowerPoint 2010 with a resolution of 1024 x 768 pixels.
Your presentation should be prepared in PowerPoint 2003, 2007 or 2010. Preferred page setup is landscape orientation with high-contrast lettering and readable fonts (minimum font size = 24)
Use high-contrast colors: light text on dark background or vice versa
A maximum of 7 lines / slide and 5 words / line will improve the communication value of your slide.
PowerPoint presentations on USB memory stick (preferred medium) disk or CD Rom must be delivered at the Speaker Preview Room at least two hours before the beginning of the session.

4 Suggestions to improve a PowerPoint presentation
• In general: the smaller your PowerPoint presentation (in size) the easier to handle it.
• Any movie/image file must be in the same folder of the Power Point presentation and must be copied in the folder before being included in the presentation. (1) Alternatively use "Pack and go" or "Package to CD/DVD/USB" in PowerPoint. For ease of possible assistance if there is a problem with your movies (not playing on standard machines because codecs under which the movie has been recorded are unknown and uninstalled on standard machines) we recommend not to use the new feature in Powerpoint 2010 to EMBED the movies inside your presentation. We advice to LINK to the movie file.
• We suggest putting maximum one movie per slide.

• The following media are recommended to facilitate the presentation download at the Slide Centre: USB memory sticks (preferred medium), CD-Roms and DVD. It is also possible to download the presentation from a personal laptop at the Slide Centre, provided that the speaker stops at the Slide Centre at least two hours before the beginning of the session.

• Only single projection is available in the congress rooms, as the Organizer does not foresee the double projection.

Transitions:
• Please don’t use timer controlled transitions. Timer controlled transitions are transitions that will switch to the next slide after x seconds or minutes. This will interfere with our cue light system and confuse you during your talk.

Pictures:
• Do NOT save the picture as BMP or TIFF (size is too big)

• Images with .gif and .jpg extensions are recommended to obtain a light presentation (other kinds of extensions -recognizable by Power Point -will be accepted all the same).

• Save the pictures used in your presentation on your CD, DVD or USB-stick (In case of problems we can re-insert the original).

Video:
• Movies must not exceed 50 MB each (50 mb is not necessary the limit, we can handle larger movies without any problems but the video may not show up smoothly). Always bring your movies on DVD or other support, and inform the technicians at the Slide Centre the day before the presentation.

MPG (MPEG), WMV or AVI are the only acceptable video formats

• When using videos in (Apple) QuickTime: convert them to MPG or AVI before inserting the video in your presentation.

QuickTime (MOV, MP4) cannot be played in PowerPoint and thus are not accepted

• Save the videos used in your presentation on your USB-stick CD or DVD (In case of problems we can re-insert the original).

HTML:
• If you use hyperlinks to websites in your presentations, please download the website to your USB-stick CD or DVD. Try to avoid many different folders on the medium.

Graphics:
• Save the graphics or spreadsheets (Excel) used in your presentation on your USB-stick CD or DVD (In case of problems we can re-insert the original graphics or spreadsheets).

Fonts:
• Try to avoid use of non-Standard Windows fonts. If you are using specific, non-Standard Windows fonts (or if you are using Apple fonts not known on Standard Windows) then: include the fonts you have used on your USB-stick CD or DVD

Apple:
• Please give your filename an extension “.PPT”. • Check your presentation on a Windows (preferably Win7 with PowerPoint 2010) machine before you bring it to the conference. This will avoid a lot of stress at the conference: you will not have to fix things that are not working after the conversion from Apple to Windows at the conference
Always try the medium with your presentation on another PC before bringing it to the conference. And as always make an extra copy of your USB or CD/DVD.
NOTE (1): Example: create the folder "PRESENTATION" and copy the necessary files for the presentation in it; then create the Power Point presentation including the films that were in the "presentation" folder. Finally save everything in the "presentation" folder.
NOTE (2): To avoid it, follow this procedure: Select the slide where to put the film, then the "Films and sounds..." item in the "insert" menu. Now click on "Film from file...". Select the desired film and press the button "OK". To the question "do you want to reproduce the film during the presentation automatically?" answer "YES".

Poster Dimensions Requirements & Set-Up Procedures

1. Poster size may be no more than 4 feet by 4 feet (i.e., length is no more than 4 feet and the width is no more than 4 feet).
2. Presenters will be assigned a specific time slot and numbered space for their poster presentation. Presenters will forfeit their opportunity to present their research if they are more than five (5) minutes late for their presentation.
3. The conference organizers will provide stands for the posters and pushpins for mounting posters. Conference organizers will also be available to assist with locating an assigned poster space.

4. All posters must be set up in the time allotted before the session, and must remain up until the session ends. Presenters are to remain by their poster during the entire assigned session time, to answer questions and be evaluated by poster judges. After the session ends, posters and materials should be promptly removed and the area cleaned up.

Criteria for Judging Poster Presentations

Given the number of posters, judges may only have 10 minutes or less to review, discuss, and evaluate a poster presentation.

Poster presentation will be evaluated based on the following criteria:

• Quality and relevance of the abstract.

• Content and lay out of the poster:
  (a) The title, names of authors, and the institution(s) where the research was performed should be included at the top of the poster.
  (b) Poster layout should be in a logical order, including text and graphics that explain the objectives of the research and why the research is important; hypothesis/statement of the problem; methods and controls; results; conclusions and future research; and references and acknowledgements.

• Presentation: Presenters should demonstrate a good understanding of the study and related areas and responds effectively and clearly to questions.

The poster session maximizes your opportunity to interact with conference participants. This year's event includes an outstanding selection of presenters and we look forward to your participation.

If you have any questions regarding your poster presentation do not hesitate to write us at epidemiology@conferenceseries.net.

Wishing you all the best!
