About Paris

Paris is the capital and the most populous city of France. It has an area of 105 km² (41 mi²) and a population in 2013 of 2,229,621 within the city limits. Paris was the largest city in the western world, a prosperous trading centre, and the home of the University of Paris, one of the first in Europe. Paris is the home of important museums and cultural institutions, including the most visited art museum in the world, the “Louvre”. In 2015 Paris received 22.2 million visitors, making it one of the world’s top tourist destinations. The city is also a major rail, highway, and air-transport hub, served by the two international airports Paris-Charles de Gaulle (the second busiest airport in Europe after London Heathrow Airport with 63.8 million passengers in 2014) and Paris-Orly. Paris is often referred to as “The City of Light” both because of its leading role during the Age of Enlightenment, and more literally because Paris was one of the first European cities to adopt gas street light.
