

18<sup>th</sup> European

# Diabetes and Endocrinology Congress

March 10-11, 2025 | Rome, Italy

SCIENTIFIC PROGRAM

**Title: The Multi Trigger Model in the Progression of Type 1 Diabetes**  
Thomas DeLong, USA

**Title: Diabetic foot ulcers: Dynamic wound care diagnoses, treatment, and its implications on morbidity and mortality**  
Hina Rizvi, USA

**Title: The role of continuous glucose monitoring/cgm/ in improving the quality of care of patients with diabetes mellitus/dm/ type -1 and – type 2 in internal medicine residency clinic**  
Andre Emanuilov Manov, USA

**Title: Rotavirus infections of pregnant mothers may serve as first trigger of childhood autoimmune (Type I) diabetes**  
Zvi Laron, Israel

**Title: A case series study of patients requiring hospitalization secondary to severe hypertriglyceridemia and managed effectively with insulin infusion**  
Mahmoud Kiblawi, United Arab Emirates

**Title: An evaluation of the innovation of e-health featuring a diabetes self-management program delivered using avatar-based technology: findings with certified diabetes educators and adults living with type 2 diabetes mellitus**  
Joanne Duncan-Carnesciali, Italy

**Title: The secretion and excretion of maggot (maggot ES) promote wound healing by regulating the differentiation subtype of macrophages**  
Tian-Yuan Wang, China

**\*\*\*\*\*Speaker Slots Available\*\*\*\*\***

**Title: Effect of peripheral blood supply on the wound healing process with diabetic foot patients**  
Ghadeer khaled Omar Alsouliman, Mouwasat Medical Company, Saudi Arabia

**Title: probiotics and its effect on immune therapy**  
Kunal Joon, India

**Title: A literature review on treatment adherence of diabetes mellitus patients and the impact of sociodemographic and patient-related factors**  
Paraskevi Theofilou, Greece

**Title: Hispidulin is an insulin secretagogue targeting the AKAP9-mediated PKA signaling pathway**  
Abdul Hameed, USA

**Title: New Glp1a And Diabetes Controlle**  
Hazem Rayyan, Saudi Arabia

**Title: Un unusual presentation of diabetic ketoacidosis associated with ascariasis and fungal esophagitis: a case report**  
Rabia Khalid Alduraibi, Saudi Arabia

**\*\*\*\*\*Speaker Slots Available\*\*\*\*\***

<p><b>Title: Unexpected cause of recurrent diabetic ketoacidosis in type 1 diabetes: a case report</b>  <b>Rabia Khalid Alduraibi, Saudi Arabia</b></p>
<p><b>Title: Diabetic Neuropathy: Patients' experiences and perceptions: A qualitative study in type 2 diabetics</b>  <b>Ibrahim El Bayoumy, Egypt</b></p>
<p><b>Title: Polymeric Nanoformulation of Acarbose Enhances Anti-Diabetic efficacy and Mitigates Oxidative Stress in HFD/STZ-Induced rats</b>  <b>Sourbh Suren Garg, India</b></p>
<p><b>Title: pre-existing diabetes in pregnancy and maternal mental</b>  <b>Shahd Hamran, Qatar</b></p>
<p><b>Title: A study on the characteristics of toluene adsorption in activated biochar of waste wood synthesis by hydrothermal carbonization</b>  <b>Jin Man Chang, University of Seoul, South Korea</b></p>
<p><b>Title: Endovascular methods for correcting angiopathy of the diabetic foot syndrome in patients after COVID-19</b>  <b>Okhunov Alisher, Uzbekistan</b></p>
<p><b>Title: Local aldosterone synthesis in mouse colon: discovery of the components of aldosterone synthesis, enzyme activation and its stimulation</b>  <b>Zan Pang, Finland</b></p>
<p><b>Title: Ectopic mediastinal parathyroid adenoma: A case report with diagnostic and management challenges</b>  <b>Augustina Konadu Larbi-Ampofo, UK</b></p>
<p><b>Title: Elevated Expression of lncRNA SOX2-OT in Type 2 Diabetes and Its Correlation with Glycemic Indices</b>  <b>Mitra Nourbakhsh, Iran</b></p>
<p><b>Title: Micro-RNAs dependent G-ELNs based intervention improves glucose and fatty acid metabolism while protecting pancreatic <math>\beta</math>-cells in type 2 diabetic mice</b>  <b>Geetika Bajaj, India</b></p>
<p><b>*****Speaker Slots Available*****</b></p>
