## Gynecologic Oncology 2018

**Atlanta** is the social and monetary focal point of the Atlanta metropolitan zone, the ninth-biggest metropolitan region in the United States. Atlanta was established at the convergence of two railroad lines and the city ascended from the fiery remains of the American Civil War to end up plainly a national focal point of business.

Atlanta has a long history of propelling drug and science. Established in 1854, the Atlanta Medical School (now known as the Emory Medical School) was one of the principal foundations in the range. Today, Emory University is one of the biggest research organizations in the United States, participating in critical multi-disciplinary research programs.

Recently, Atlanta has become a major conference and convention destination, due mostly to the vast airport and being the financial hub of the South. The original World of Coca-Cola saw around nine million visitors during its years of operation, becoming Atlanta's most visited indoor attraction. The Georgia Aquarium is a public aquarium in Atlanta, the world's largest when it opened in November 2005, the aquarium encompasses 550,000 square feet of covered space; its exhibits hold 8,000,000 US gallons of fresh and salt water. With such a large number of offerings all pressed into one enthusiastic city, participants may wind up broadening their stay a day or two.
