Welcome Message

Dear Colleagues, Scientists and Friends,

On behalf of our Organizing Committee Members (OCM), I would like to welcome you to the 4th Global Summit on Heart Diseases. This conference has been in existence for 3 years all over the world and has entered its 4th year in Singapore with the promise of bringing down the level of heart diseases deaths in the world. It is our pleasure to serve this kind of an international event and is thankful to you for being part of this initiative. Furthermore, I would like to personally welcome each of you to the Heart Diseases Summit 2018.

It is an exciting time for Heart Diseases Summit 2018 as we continue to grow and adapt, remaining always adaptable, motivated and responsive participants—focused, relevant and open to new ideas. Our conference is confronting a time of many changes and we are meeting these changes during a time of larger nation-wide and global change. The world of heart diseases is an exciting area in which to study, and we will continue to meet and bring inspired scholars, researchers and scientists together in forums like this, to ensure our Conference Series LLC LTD remains at the cutting edge. I would like to give you an idea of what you can expect and what we hope to achieve over the September 14–15, 2018 Singapore. Let me give you a brief update on where we are today. We are transforming the way we operate to continuously improve our ability to prevention heart diseases, diagnosis heart diseases and treatment heart diseases. Our participants and partners have continued to meet the challenges of our field and to excel despite setbacks. We should all be very proud of where we are today and excited about where we are headed.

Before I close, I would like to thank each of your for attending our conference and bringing your expertise to our gathering. I, as conference chairman, have the vision, the knowledge, the wherewithal and the experience to help us pave our way into the future. You are truly our greatest asset today and tomorrow, and we could not accomplish what we do without your support and leadership. Throughout this conference, I ask you to stay engaged, keep us proactive and help us shape the future of heart diseases. My personal respect and thanks goes out to all of you.

Thank you for being a part of the conference.

Yours sincerely,

Prof. Dr. Alireza Heidari, Ph.D., D.Sc.

Full Professor and Academic Tenure of Chemistry &
Director of the BioSpectroscopy Core Research Laboratory at
Faculty of Chemistry, California South University (CSU), Irvine, California, USA &
President of American International Standards Institute (AISII), Irvine, California, USA

Organizing Committee Members

Alireza Heidari

Professor
California South University
USA

Christopher Brown

Professor
California South University
USA

Carol Thomson

Professor
California South University
USA

Ricardo Gobato

Professor
State Secretary of Education of Parana
Brazil

Conference Sessions:

All honorable authors, researchers, scientists and students are encouraged to contribute and help the shape of the conference through submissions of their posters & research abstracts. Also, high quality research contributions describing original and unpublished of conceptual, constructive, experimental or theoretical work in all areas of Cardiology and Healthcare are warmly invited for presentations at the conference. The conference memorial contributions of abstracts and posters that address themes & future aspects of the conference related sessions.

- Heart Disease & Failure
- Heart Diagnosis & Devices
- Cardiac Nursing and Healthcare
- Pediatric & Geriatric Cardiology
- Cardiovascular Surgeries
- Cardiologists
- Cardiovascular Toxicology and Pharmacology
- Cardio-Oncology
- Heart and Obesity
- Clinical Cardiology
- Cardiac Regeneration
- Cardiovascular Engineering
- Nuclear Cardiology & Cardiac CT
- Molecular Cardiology & Hypertension
- Vascular Heart Disease
- Myocardial and Pericardial Disease
- Pediatric Cardiology
- Arrhythmias
- Critical Cardiac Care
- Cardiovascular Diseases and Nutrition

Speaker Slots Available

NOTE: Program Schedule is subject to change with final allotment of the speaker slots

Glimpses of Heart Diseases 2017

Singapore, officially the Republic of Singapore, is a sovereign city-state and island country in Southeast Asia. It lies off the southern tip of the Malay Peninsula and is 137 kilometres (85 mi) north of the equator. The country's territory consists of the lozenge-shaped main island, commonly referred to as Singapore Island in English and Pulau Ujong in Malay, and more than 60 significantly smaller islets. Singapore is separated from Peninsular Malaysia by the Straits of Johor to the north and from Indonesia's Riau Islands by the Singapore Strait to the south. The country is highly urbanized, and little of the original vegetation remains. The country's territory has consistently expanded through land reclamation.

Singapore's progress over the past three decades has been remarkable, yet the island has not been overwhelmed by development. Visitors will discover a wealth of historical treasures from the past, in the beauty of older buildings, values and traditions that have survived in the face of profound social and geographical change.

Singapore is both an island and a country, but perhaps its best description is that of city-state. Like the great city-states of the past, it offers civilization and order in the highest degree. Its combination of Western-style development and Eastern-style calm seems to present the best of both hemispheres: It's a modern metropolis where you feel safe walking the streets, and it's an Asian business center that's a model of efficiency. Singapore is also a multicultural city, and close to one-quarter of its population are expatriates or foreign workers from all over the world. Known for its desire to become the technology hub of Asia, Singapore is the most wired country in the region.
