Conference Sessions:

All honorable authors, researchers, scientists and students are encouraged to contribute and help the shape of the conference through submissions of their posters & research abstracts. Also, high quality research contributions describing original and unpublished of conceptual, constructive, experimental or theoretical work in all areas of Cardiology and Healthcare are warmly invited for presentations at the conference. The conference memorial contributions of abstracts and posters that address themes & future aspects of the conference related sessions.

- Heart Disease & Failure
- Heart Diagnosis & Devices
- Cardiac Nursing and Healthcare
- Pediatric & Geriatric Cardiology
- Cardiovascular Surgeries
- Cardiologists
- Cardiovascular Toxicology and Pharmacology
- Cardio-Oncology
- Heart and Obesity
- Clinical Cardiology
- Cardiac Regeneration
- Cardiovascular Engineering
- Nuclear Cardiology & Cardiac CT
- Molecular Cardiology & Hypertension
- Vascular Heart Disease
- Myocardial and Pericardial Disease
- Pediatric Cardiology
- Arrhythmias
- Critical Cardiac Care
- Cardiovascular Diseases and Nutrition

Speaker Slots Available

NOTE: Program Schedule is subject to change with final allotment of the speaker slots

Venue

Singapore, officially the Republic of Singapore, is a sovereign city-state and island country in Southeast Asia. It lies off the southern tip of the Malay Peninsula and is 137 kilometres (85 mi) north of the equator. The country’s territory consists of the lozenge-shaped main island, commonly referred to as Singapore Island in English and Pulau Ujong in Malay, and more than 60 significantly smaller islets. Singapore is separated from Peninsular Malaysia by the Straits of Johor to the north and from Indonesia’s Riau Islands by the Singapore Strait to the south. The country is highly urbanized, and little of the original vegetation remains. The country’s territory has consistently expanded through land reclamation.

Singapore’s progress over the past three decades has been remarkable, yet the island has not been overwhelmed by development. Visitors will discover a wealth of historical treasures from the past, in the beauty of older buildings, values and traditions that have survived in the face of profound social and geographical change.

Singapore is both an island and a country, but perhaps its best description is that of city-state. Like the great city-states of the past, it offers civilization and order in the highest degree. Its combination of Western-style development and Eastern-style calm seems to present the best of both hemispheres: It’s a modern metropolis where you feel safe walking the streets, and it’s an Asian business center that’s a model of efficiency. Singapore is also a multicultural city, and close to one-quarter of its population are expatriates or foreign workers from all over the world. Known for its desire to become the technology hub of Asia, Singapore is the most wired country in the region.
