**About Tokyo**
Tokyo, the capital of Japan. It is the most populous metropolitan area in the world. It is one of the 23 central city wards, 47 prefectures of Japan and multiple cities, towns and villages west of the city center. Tokyo is the seat of the Emperor of Japan and the Japanese government. It is ranked as the first in the Global Economic Power Index and fourth in the Global Cities Index. Tokyo National Museum specializing in traditional Japanese art. Tokyo has the Japan’s largest museum; it has an unlimited choice for shopping, entertainment, culture and dining to the visitors. The history can be appreciated in districts such as Asakusa, and in many excellent museums, gardens and historic temples. Tokyo has a number of attractive green spaces in the city and relatively short train rides at its outskirts. The majority of Tokyo lie in the humid subtropical climate zone, with warm humid summers and generally cool winters with cold spells. The region, like much of Japan, experiences a onemonth seasonal lag, with the warmest month being August, which averages 26.4 °C (79.5 °F), and the coolest month being January, averaging 5.2 °C (41.4 °F).
