Exhibition and Sponsorship

An Exhibition will be held concurrently with the Conference. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Nutrition.

About Tokyo

Tokyo is the capital city of Japan and it is the world's most populous metropolis with its stunning, stimulating and seductive atmosphere. It is one of Japan's 47 prefectures, consisting of 23 central city wards and multiple cities, towns and villages west of the city centre. Before 1868, Tokyo earlier known as Edo, was a small castle town in the 16th century. It became Japan's political centre in 1603 under Tokugawa Ieyasu then, after Emperor Meiji moved his seat to the city from the old capital of Kyoto in 1868, it became the official capital. The city's history can be appreciated in regions like Asakusa, and in many brilliant museums, historic temples and gardens.

Tokyo has the leading metropolitan economy in the world and is a major international finance center . It houses the headquarters of several of the world's largest investment banks and insurance companies, and serves as a hub for Japan's transportation, publishing, electronics and broadcasting industries. Public transportation within Tokyo is ruled by an widespread network of clean and efficient trains and subways run by a variety of operators, with buses, monorails and trams playing a secondary feeder role.
