Venue

Tokyo, Japan

Important Dates

Abstract submission opens: 15th November, 2018

Registration opens: 15th November, 2018

Early bird registration: 28th December, 2018

On spot registration: 17th September, 2019

Accommodation

A large number of rooms have been reserved. Discounted room rates for Kinesiology 2019 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Conference. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Cardiology and Medicine.

About Tokyo

Tokyo, officially Tokyo Metropolis, is the capital city of Japan and one of its 47 prefectures. The Greater Tokyo Area is the most populous metropolitan area in the world. Tokyo is a fast-paced city with an almost manic energy. The city is constantly changing, as the local obsession with newness makes fashions fade fast and the latest technologies quickly obsolete. However, the hyper-urban cosmopolis does have a more traditional side that, although not immediately evident, is still there to charm travellers with its shrines, public baths and leafy parks. The city is also as important historically as it is in the pop-culture world. The imperial family is a source of pride and an institution, and residents mix traditional societal mores with cutting-edge inventions, art, fashion and music. The Japanese capital and its culture are taking the world by storm, but it still stays faithful to its origins. Tokyo is Japan's major cultural centre. Displays depicting the art and history of Japan and Asia are featured at the Tokyo National Museum in Ueno Park. Ueno Park is also the site of a science museum, a zoological garden, and two major art museums.
