# Major Scientific Sessions

- Respiratory Diseases
- Lung Cancer
- COPD
- Respiratory and Pulmonary Therapies
- Prevention of Lung disorders
- Asthma
- Pulmonary Fibrosis and Cystic Fibrosis
- Tuberculosis
- Cardiopulmonary disorders
- Lung Transplantation
- Respiratory Tract Infections
- Sleep Apnea
- Effect of Smoking
- Advances in Respiratory Medicine
- Advanced respiratory equipment

## Best Poster Award

- You will be given about 5-7 minutes to present your poster including questions and answers. Judges may pose questions during the evaluation of the poster
- Judges will even evaluate the student's enthusiasm towards their study, interest and knowledge in the area of their research
- The winners will be announced at the closing ceremony of the conference. The decision of the winner will be withdrawn if the winner/winners is/are not present at the time of announcement
- Apart from the judging time you may also be present at the poster to share your research with interested delegates

## Young Researchers Forum

- Present your research through oral presentations
- Learn about career development and the latest research tools and technologies in your field
- This forum will give pertinent and timely information to those who conduct research and those who use and benefit from research
- Develop a foundation for collaboration among young researchers
- The forum will provide an opportunity for collegial interaction with other young investigators and established senior investigators across the globe
- Interact and share ideas with both peers and mentors

# About Toronto

Toronto is Canada's largest city, the fourth largest in North America, and home to a diverse population of about 2.8 million people. It's a global center for business, finance, arts and culture and is consistently ranked one of the world's most livable cities. Toronto has a vibrant history of change and growth, ranging from its early occupation over 1,000 years ago to its current status as North America's fourth largest city. Toronto is Canada's largest municipality and is made up of the former cities of Toronto, North York, Scarborough, York and Etobicoke, and the former borough of East York. The city is home to a large immigrant population, and is a national and international hub for finance, communications and cultural life. Diverse cultures, climates and landscape make Canada a destination to suit any interest. Canada is a country of immigrants and has a policy of encouraging diversity. Thus, urban hubs feature a range of ethnic neighborhoods, restaurants, and shops. In addition to rich and varied urban centers, Canada's natural environment is one of the most beautiful in the world. From pristine coastlines to rugged mountains and sparkling lakes, Canada's geography inspires awe coast to coast.

The western side of Toronto is sometimes only thought of as place where industry and residences bump up against each other, but it is also a place where there are wonderful parks and waterways and where numerous pockets of small businesses and local spirit create active and diverse communities. Combining suburban enclaves and malls with condominium developments and the dense business district surrounding the North York Civic Centre, the north-central tip of Toronto is at once both relaxed and exciting. The area is also home to York University and Black Creek Pioneer Village
