Program Announcement

Venue

Hong Kong

Important Dates

Abstract submission opens: June 02, 2018

Registration opens: June 02, 2018

Early bird registration: August 29, 2018

On spot registration: March 27, 2019

Accommodation

A large number of rooms have been reserved. Discounted room rates for Medical Oncology 2019 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Conference. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Addictive Disorders and Alcoholism. We provide the opportunities to Health Centre, pharmaceutical companies, hospitals, research centers, authors, associations, etc. to sponsor/exhibit at the conference.

- Provides a respected forum for your ideas on topics that affect your business
- Presentations opportunities to form important, new business relationships
- Develops market leadership, through a role that fosters dialogue on key business issues and trends
- Highly polished marketing for the conference you choose, to draw the audiences you wish to reach
- Generates prospects and sales, by bringing customers to you
- Amplifies your message, by providing a setting of heightened receptiveness

About Hong Kong

Hong kong is considered as an important centre for higher education and harbours, healthcare, well reputed and prestigious colleges and Universities. It can be considered as a suitable medium for the relocation of valuable knowledge about research and novel advancements worldwide. The conferences taking part here would promote a variety of scientific ideas among contenders belonging to diverse areas of science and technology. Cancer patients in Hong Kong will receive more advanced and timely treatments once the city's first cancer centre begins operations in eight years, the head of the billion-dollar project has said . Hong kong excels in the five-year survival rates of colon cancer, lung cancer, pancreatic cancer and liver cancer based on the comparison of a report by the American Association of Oncology and another report by the Hong Kong Foundation for the Promotion of Cancer research. The same comparison shows that the US excels in the five-year survival of rectal cancer, breast cancer, prostate cancer and malignant lymphoma. Surgical outcomes tend to be better in Hong kong for most cancers while overall survival tend to be longer in the US due to the more aggressive use of chemotherapy in late stage cancers
