Japan is a fascinating country of economic and business prowess, rich culture, technical wizardry, spatial conundrums and contradictions. Japan held onto the title of the world's second largest economy for more than 40 years from 1968 to 2010. Tokyo, Japan's capital city, is the world's largest metropolitan area, with a population of 32.5 million people. Japan is the world's third largest economy, having ceded the second spot to China in 2010. Since the collapse of the property bubble in 1989 Despite Japan's challenging domestic economic environment, many Japanese companies have continued to perform well on the world stage.
