Accepted Abstracts

Title: To determine the knowledge of mechanical heart valve replacement patient regarding oral anticoagulants

Roheeda Riaz Khan
Pakistan

A cross-sectional study on patients with mechanical valve prostheses was conducted at Lady Reading Hospital Peshawar, Khyber Pakhtunkhwa, Pakistan. The duration of the study was 6 months. Overall, 345 participants were included in the study. Consecutive sampling technique has been used. Information was collected using adopted, validated questionnaire.

Nurses work environment plays a fundamental role in nurse's performance and their productivity which has a direct impact on patient safety.

Title: The overarching aim of this was to determine nurses' perception of their work environment in public sector tertiary care hospitals of Khyber Pakhtunkhwa

Rashida bibi
RN. RM from AKUH, Pakistan

Title: Remission of Post Polio Syndrome following by spinal manipulation

Eric Chun Pu Chu
Eric Chun Pu Chu, BSc, DC, MHA, ICCSP,
FRCC, Hong Kong

After the introduction of effective vaccines in the 1960s, paralytic poliomyelitis (polio) was almost eliminated as a public health problem in most countries. After recovery from the acute attack of poliomyelitis virus, it was believed that the survivors would remain stable in their health conditions.

Accepted Abstracts

Title: Investigating the correlation between job satisfaction, autonomy, and self-efficacy among school nurses in Bahrain – A mixed method studies

Faten Hassani
Bahrain

Hospitals, clinics, nursing homes, and health centres are the traditional places where nurses work, but nurses have recently started working in new areas such as government and private schools, and they play a critical role in better health outcomes in the education setting.

It has received great attention to the influencing factors of gut microbiota transform from mother to infant. They can significantly impact infant gut microbiota colonization and development which is crucial to its health in later life.

Title: Effect of diet and alcohol consumption on gut microbiota in pregnant women and offspring

Ying Wang
MSN, China

City Attractions

Venue

Hong Kong, officially the Hong Kong Special Administrative Region of the People's Republic of China, is an autonomous territory in China, south of the mainland Chinese province of Guangdong and east of the former Portuguese colony and fellow Special Administrative Region (SAR) of Macao

Hong Kong has created from a little angling town in the 1800s into a dynamic and exciting 21st-century cosmopolitan city. It is a clamouring seaside city loaded with noteworthy elevated structures and a combination of eastern and western societies. It gladly declares itself to be 'Asia's World City' and remains a key door to China.

Hong Kong is without a doubt one of the busiest intersections amongst China and whatever is left of the world for business voyagers. Aside from gatherings and meetings, it is likewise the best visitor goal in Asia with its draw of shopping and plenty of feasting choices.
