Invitation

Optics-Photonics 2018

Philadelphia
USA
SEPTEMBER 19-20
2018

Dear Attendees,

We are glad to announce the **International Conference on Vehicle Fiber-Optics and Photonics Conference** to be held in Philadelphia, USA from September 19-20, 2018 organized by Conference Series LLC, USA in collaboration with generous support and cooperation from enthusiastic academicians and editorial Board Members.

ConferenceSeries Ltd, Scientific Event Organizer and the World Class Open Access Publisher, announcing its **International Conference on Vehicle Fiber-Optics and Photonics Conference during September 19-20, 2018 at Philadelphia USA**. This interesting event is managed in such a way to provide an exclusive platform for educators, new researchers, and learners to present and discuss the most recent innovations, possibilities, and concerns adopted in the field. **Optics-Photonics 2018** will comprise an informative and exciting conference program including leading keynote speakers, poster presenters, session speakers who will be presenting their research on the topics related .

Optics and Photonics create a platform to globalize the research by installing a dialogue between industries and academic organizations and knowledge transfer from research to industry & vice versa. Optics-Photonics 2018 aims in gathering the professionals, industrialists and students from research areas of Optics and Photonics to proclaim knowledge and share new ideas which can be used across all the other Physics and Engineering fields, such as Optics and Photonics , Optical physics, Fiber optics, Applied physics, Quantum physics, Aeronautical, Electronics, physics, materials science, and engineering fields and their research experiences in interactive discussions and special sessions at the event.

Therefore to acquire all this knowledge we invite you heartedly to join us at the Optics-Photonics 2018 where you will be sure to have a great experience with experts from around the world. All the important members of Optics-Photonics 2018 organizing committee look further to meet you at Philadelphia, USA.

Life is full of give and take. Make it count in your professional life. Attend the Optics-Photonics 2018 Conference to network with your peers, exchange expertise and experiences, and arm yourself with the latest information to take your department to the next level.

We look forward to personally welcoming you to Philadelphia, USA

Sincerely,
Optics-Photonics 2018
Organizing Committee

About Conference

Optics-Photonics 2018

Philadelphia
USA
SEPTEMBER 19-20
2018

Optics-Photonics 2018 Conference website is attracting Researchers, Academicians and Business Professionals who are working in this field. This unique opportunity that we extend to our speakers and attendees is not being offered by any other conference organizers. Through this the abstracts and research profiles of our speakers and organizing committee members getting global visibility which is an additional feature that you would be receiving in addition to networking opportunities before, during and after the conference.

How Conference Series Conferences differs from others?

- 3000+ Conferences across the globe in 70+ countries Annually
- Over 25 Million+ Visitors and 20000+ Unique Visitors per conference
- Participation by Stalwarts from various international societies
- Internationally renowned speakers and scientists representation
- Career guidance for early career researchers and students
- Interesting scientific deliberations and discussions
- Perfect platform for Global Networking

Optics-Photonics 2018 salient features

- Meet Academia and Industry visionaries to get inspired
- Expand your knowledge and find solutions to problems
- Knowledge, Benchmarking and Networking offered at one place
- Forge connections and for global networking
- Highly Organized and Structured Scientific programs
- Poster presentations and world class exhibitions
- Meet with new vendors and suppliers

About Conference

Optics-Photonics 2018

Philadelphia
USA
SEPTEMBER 19-20
2018

Purpose

International Conference on Vehicle Fiber-Optics and Photonics Conference is an arena for interdisciplinary exchange among professionals in the fields of Optics and Photonics Researches.

Goals

The conference program emphasizes evidence-based practice, educational innovation, practical application, and peer to peer networking and collaboration. The goals of the conference is to provide a transformative professional development experience

Bringing together the world's scientific experts to catalyze and advance scientific knowledge about Optoelectronics and Photonics, Physics Sectors present the most recent research findings, and promote and enhance scientific collaborations around the world

Bringing together community leaders, scientists, and policy leaders to promote and enhance programmatic collaborations to more effectively address regional, national and local responses to Elderly Population around the world and overcome barriers that limit access to care and services.

Objectives

After participating in this meeting, attendees should be able to

Discuss emerging issues in Optics and Photonics

Discuss and apply recent research findings related to Optics and Photonics

Reflect on the place of critical distance in Optics

About Conference

Optics-Photonics 2018

SEPTEMBER 19-20
2018

Who should attend

Optoelectronics and Photonics create a platform to globalize the research by installing a dialogue between industries and academic organizations and knowledge transfer from research to industry & vice versa. Optoelectronics 2018 aims in gathering the professionals, industrialists and students from research areas of Optoelectronics to proclaim knowledge and share new ideas which can be used across all the other Physics and Engineering fields, such as Optoelectronics , Optical physics, Fiber optics, Applied physics, Quantum physics, Aeronautical, Electronics, physics, materials science, and engineering fields and their research experiences in interactive discussions and special sessions at the event.

About hosting organization

Conference Series is the world's leading specialist in organizing Academic, Scientific and Business conferences, meetings, symposiums and exhibitions in different verticals and horizontals like Engineering, Science, Technology and Business to promote scientific research. Every year we host more than 3000+ global events inclusive of 1000+ Conferences 1000+ Symposiums 1000+ Workshops in USA, Europe, USA, Asia and Middle East with the generous support and cooperation from our 30000+ Editorial Board Members, 1000+ Scientific Societies. All the conference proceedings are published in the special issues of our 700+ Open Access International Journals with the DOI provided by

Major sessions

- Optical Fiber Technology
- Automotive Fiber Optics
- Optical Components & Modules
- Optical Sensors
- Optical Links and Networks
- Remote Sensing
- Optical Components and Modules
- Fiber optics Deployment
- Modeling and simulation
- Free Space Optics
- Micro/Nano Lithography
- Wavelength division multiplexing
- Health Monitoring / Built-In Test

About Conference

Optics-Photonics 2018

Supporting Journals

- Journal of Lasers, Optics & Photonics
- Journal of Physical Chemistry & Biophysics
- Journal of Electrical & Electronic Systems

Philadelphia is the largest city in the Commonwealth of Pennsylvania and the sixth-most populous city in the United States, with an estimated population of 1,567,872 and more than 6 million in the seventh-largest metropolitan statistical area, as of 2016. Philadelphia is the economic and cultural anchor of the Delaware Valley—a region located in the Northeastern United States at the confluence of the Delaware and Schuylkill Rivers with 7.2 million people residing in the eighth-largest combined statistical area in the United States.

In 1682, William Penn, an English Quaker, founded the city to serve as capital of the Pennsylvania Colony. Philadelphia played an instrumental role in the American Revolution as a meeting place for the Founding Fathers of the United States, who signed the Declaration of Independence in 1776 and the Constitution in 1787. Several other key Philadelphia events during the Revolution include the First and Second Continental Congress, the preservation of the Liberty Bell, the Battle of Germantown, the Siege of Fort Mifflin, and the Philadelphia Convention. Philadelphia was one of the nation's capitals in the Revolutionary War, and served as temporary U.S. capital while Washington, D.C., was under construction. In the 19th century, Philadelphia became a major industrial center and a railroad hub. It grew from an influx of European immigrants; the majority came from Ireland, Italy and Germany—the three largest reported ancestry groups in the city as of 2015. The city became a prime destination for African Americans during the Great Migration of the 20th century, as well as Puerto Ricans, surpassing two million occupants by 1950.

The Philadelphia area's many universities and colleges make it a top study destination, as the city has evolved into an educational and economic hub. With a gross domestic product of \$388 billion, Philadelphia ranks ninth among world cities and fourth in the nation. Philadelphia is the center of economic activity in Pennsylvania and is home to five Fortune 1000 companies. The Philadelphia skyline is growing, with a market of almost 81,900 commercial properties in 2016 including several nationally prominent skyscrapers.
