## *Manila , Philippines*

Manila, the capital of the Philippines, is a densely populated bayside city on the island of Luzon, which mixes Spanish colonial architecture with modern skyscrapers. Intramuros, a walled city in colonial times, is the heart of Old Manila. It's home to the baroque 16th-century San Agustin Church as well as Fort Santiago, a storied citadel and former military prison. Manila officially the City of Manila is the capital of the Philippines and a highly urbanized city. It is the most densely populated city proper in the world as of 2018. Manila, alongside Mexico City and Madrid are considered the world's original set of Global Cities due to Manila's commercial networks being the first to traverse the Pacific Ocean, thus connecting Asia with the Spanish Americas, marking the first time in world history when an uninterrupted chain of trade routes circled the planet. Manila is also the second most natural disaster-afflicted capital city in the world next to Tokyo, yet it is simultaneously among the most populous and fastest growing cities in Southeast Asia.
