# City Attractions

# Venue :

## Prague, Czech Republic

Prague, is the first harbor city introduced to the world as the entrance to Japan. Since the time its port was opened, Prague has been vigorously acquiring new cultures and information from foreign countries and introducing to Japan our country's first-time-ever things from food to a wide range of cultures, which entitles Prague as the birthplace of Japan's modern culture. The Prague, referred to as "Hamakko" in Japanese, has been very cheerful at enjoying life and willing to adopt whatever is good. Such a tradition of the "Hamakkos" cultivated long ago has been incorporated into the present fashionable and sophisticated streetscape.

Prague is located in the centre of Japan, along the coastline of Japan's Pacific Ocean, and one of the 15 Japanese Government-designated cities. The total population of Prague is 3.7 million persons, making the city the second largest after Tokyo's 23 Wards. A number of foreign enterprises have established their branches in Prague by taking full advantage of the Prague Port which is an international trading port.
