

4th World Congress on

Petroleum Engineering and Natural Gas Recovery

December 07-08, 2020 | Sydney, Australia

Theme: “New and advanced techniques in Petroleum and Refinery industry”

Invitation...

Dear Colleagues,

4th World Congress on Petroleum Engineering and Natural Gas Recovery (PETROLEUM CONFERENCE 2020) extends its welcome to you during **December 07-08, 2020** at **Sydney, Australia**. with a theme **"New and advanced techniques in Petroleum and Refinery industry"**. Conference Series LLC Ltd Organises 1000+ Conferences Every Year across USA, Europe & Asia with support from 1000 more scientific societies and Publishes 700+ Open access journals which contains over 50000 eminent personalities, reputed scientists as editorial board members.

The **PETROLEUM CONFERENCE 2020** intends to gather all the people across the globe like students, lecturers, Assistant Professors, Professors, Directors, Chairman, Chancellor, Scientists, Doctors, Managing Directors, Chief Executive Officers, Presidents and Noble Laureates and base a platform for them to share their experience, knowledge and research work, recent advancements in the field of Petroleum Engineering and Natural Gas Recovery.

Why to Attend???

Petroleum engineering conference aims at multi-disciplined audience with diverse commercial, technical, corporate, operations, planning sectors of the upstream oil and gas engineering services. Meet Your Target Market with members from around the world focused on learning and sharing about Upstream Scientists/Engineers; this is your single best opportunity to reach the largest assemblage of participants from the global Oil and gas engineering industry. Conduct demonstrations, distribute information, meet with current and potential customers, make a splash with a new product line, and receive name recognition at this 2-day event. World-renowned speakers, the most recent techniques, tactics, and the newest breakthroughs in the upstream sector of oil and gas engineering are hallmarks of this conference.

Conference Sessions:

All honorable authors, researchers, scientists and students are encouraged to contribute and help the shape of the conference through submissions of their posters & research abstracts. Also, high quality research contributions describing original and unpublished of conceptual, constructive, experimental or theoretical work in all areas of Petroleum Engineering and Natural Gas Recovery are warmly invited for presentations at the conference. The conference memorial contributions of abstracts and posters that address themes & future aspects of the conference related sessions.

- Advances in Petroleum Engineering
- Fuels and Refining
- Petroleum Geology
- Petroleum Distillation and Refining
- Reservoir Engineering
- Petrochemistry
- Processing units used in refineries
- Field Development & Production Operations
- Geophysical Exploration
- Hydraulic Fracturing
- Advanced Drilling Technologies
- Computer Applications in Petroleum Engineering
- Computational Modelling Techniques
- Advanced Natural Gas Engineering
- Petrophysics & Petrochemistry
- Environmental Impacts in Petroleum Engineering
- Petroleum Substitutes
- Major Challenges in Petroleum Industry

PETROLEUM CONFERENCE 2020

- Opportunity to attend the presentations delivered by eminent scientists and business professionals from all over the world.
- Selected contributions will be published in following reputed high impact factor Journals.
 - ☞ Oil & Gas Research
 - ☞ Journal of Soil Science & Plant Health
 - ☞ Chemical Sciences Journal
 - ☞ Industrial Chemistry: Open Access

Program at Glance

December 07, 2020

Time	Session
08:30 - 09:30	Registrations
09:30 -11:30	Keynote Forums
	Group Photo
11:30 -11:45	Network & Refreshment Break
11:45 -13:00	Petroleum Geology Reservoir Engineering Advances in Petroleum Engineering
13:00 -13:45	Lunch Break
13:45 -16:00	Petrophysics & Petrochemistry Hydraulic Fracturing Geophysical Exploration
16:00 -16:15	Network & Refreshment Break
16:15 -18:00	Petroleum Distillation and Refining Petrochemistry Field Development & Production Operations
	Day Concludes

December 08, 2020

Time	Session
08:30 - 09:30	Registrations
09:30 -10:30	Keynote Forums
10:30 -11:30	Fuels and Refining Processing units used in refineries Field Development & Production Operations
11:30 -11:45	Network & Refreshment Break
11:45-13:00	Advanced Natural Gas Engineering Environmental Impacts in Petroleum Engineering
13:00 -13:45	Lunch Break
13:45 -16:00	Major Challenges in Petroleum Industry
16:00 -16: 15	Network & Refreshment Break
16:15 -18:00	Poster Presentations
	Day Concludes
	Award Ceremony
	Conferece Concludes

City Attractions

Venue :

Sydney, Australia

Sydney is the state capital of New South Wales and the most populous city in Australia and Oceania. Located on Australia's east coast, the metropolis surrounds Port Jackson and extends about 70 km (43.5 mi) on its periphery towards the Blue Mountains to the west, Hawkesbury to the north, the Royal National Park to the south and Macarthur to the south-west. Sydney is made up of 658 suburbs, 40 local government areas and 15 contiguous regions. Residents of the city are known as "Sydneyiders".

As of June 2017, Sydney's estimated metropolitan population was 5,230,330 and is home to approximately 65% of the state's population.

Indigenous Australians have inhabited the Sydney area for at least 30,000 years, and thousands of engravings remain throughout the region, making it one of the richest in Australia in terms of Aboriginal archaeological sites. During his first Pacific voyage in 1770, Lieutenant James Cook and his crew became the first Europeans to chart the eastern coast of Australia, making landfall at Botany Bay and inspiring British interest in the area. In 1788, the First Fleet of convicts, led by Arthur Phillip, founded Sydney as a British penal colony, the first European settlement in Australia. Phillip named the city Sydney in recognition of Thomas Townshend, 1st Viscount Sydney. Penal transportation to New South Wales ended soon after Sydney was incorporated as a city in 1842.

A gold rush occurred in the colony in 1851, and over the next century, Sydney transformed from a colonial outpost into a major global cultural and economic centre. After World War II, it experienced mass migration and became one of the most multicultural cities in the world. At the time of the 2011 census, more than 250 different languages were spoken in Sydney. In the 2016 Census, about 35.8% of residents spoke a language other than English at home. Furthermore, 45.4% of the population reported having been born overseas, making Sydney the third largest foreign born population of any city in the world after London and New York City, respectively.
