Dear Colleagues,

Conference Series llc LTD., is delighted to welcome you to Seoul, South Korea for the Prestigious **19th World Congress on Advances in Pharmaceutical Sciences**. Pharmsci 2019 will focus on “**Potential Challenges and Strategies to Tackle Emerging Pharma Innovations**”. We are confident that you will enjoy the Scientific Program of this upcoming Conference.

We look forward to see you at Seoul, South Korea.

With Regards,
Pharmsci 2019

Operating Committee, Conference Series LLC Conferences

Editorial Board Members of Supporting Journals:

Alexey Goltsov

Abertay University, UK

Juan Bueno

Caldas University, Colombia

Lu Cai

University of Louisville, USA

Gamil S G Zeedan

National Research Centre, Egypt

Charles J Malemud

Case Western Reserve University, USA

Haval Shirwan

University of Louisville, USA

Antonino Carbone

IRCCS C R O, Italy

Akira Ukimura

Osaka Medical College, Japan

Udai P Singh

University of South Carolina, USA

Volker Kroemker

University of Applied Science, Germany

Program Announcement

12+ Interactive Sessions

Venue

Seoul, South Korea

Important Dates

Registration opens: October 01, 2018

Early bird registration: November 26, 2018

On spot registration: January 27, 2019

Accommodation

A large number of rooms have been reserved. Discounted room rates for Pharmsci 2019 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Medical, Nanoscience and Nanotechnology.

About Seoul

Seoul, the capital of South Korea, is a huge metropolis where modern skyscrapers, high-tech subways and pop culture meet Buddhist temples, palaces and street markets. Notable attractions include futuristic Dongdaemun Design Plaza, a convention hall with curving architecture and a rooftop park; Gyeongbokgung Palace, which once had more than 7,000 rooms; and Jogyesa Temple, site of ancient locust and pine trees.

Seoul is first recorded as Wiryeseong, the capital of Baekje (founded in 18 BC) in the northeastern Seoul area. There are several city walls remaining in the area that date from this time. Pungnaptoseong, an earthen wall just outside Seoul, is widely believed to have been at the main Wiryeseong site. As the Three Kingdoms competed for this strategic region, control passed from Baekje to Goguryeo in the 5th century, and from Goguryeo to Silla in the 6th century.

Seoul is the capital and largest city in South Korea. The official name of the city is the Seoul Special Metropolitan City. Seoul is situated in the northwest part of South Korea on the Han River. As of January 2017, the population of Seoul is 10,197,604 people. The sprawling metropolitan area is much larger at 25.6 million people – the 5th most populous in the world. Seoul is noted for its population density, which is almost twice that of New York and eight times greater than Rome. Seoul comprises 605 square kilometers (234 square miles), with a radius of approximately 15 kilometers (9 miles), roughly bisected into northern and southern halves by the Han River. The city is bordered by eight mountains, as well as the more level lands of the Han River plain and western areas.
