## *About Tokyo*

*Tokyo is the capital city of Japan and one of its 47 prefectures. The Greater Tokyo Area is the most populous metropolitan area in the world. Tokyo is a fast-paced city with an almost manic energy. The city is constantly changing, as the local obsession with newness makes fashions fade fast and the latest technologies quickly obsolete. However, the hyper-urban cosmopolis does have a more traditional side that, although not immediately evident, is still there to charm travellers with its shrines, public baths and leafy parks. The city is also as important historically as it is in the pop-culture world.*
