Bangkok the city capital and the chief port of Thailand. It is the main cosmopolitan city in a nation of communities and towns and is Thailand's social and business focus.

Present day Bangkok has experienced touchy development, which the specialists have endeavored to coordinate by methods for a progression of all-inclusive strategies since the 1960s. The downtown area, once encased by a divider, has for quite some time been thickly created. The later extension has spread outward well past the managerial limits into the encompassing farming zones. A few areas have developed into useful units as the internal city has turned out to be increasingly institutional and business and the external city progressively private and modern.

The amazing accommodation of Thailand has for quite some time been a well-known decision for meetings and events in Southeast Asia. Its lively capital, Bangkok, is a top universal conference destination, and its top of the line meeting scenes are famous for their exceptional administration.

Bangkok is anything but difficult to get to, gratitude to the new Suvarnabhumi International Airport, opened in 2006, the air terminal handles more than 40 million travelers for each year from most significant urban communities in North America, Asia, and Europe, and associates with the city by means of electric rail, bypassing Bangkok's congested roads. The Don Mueang International Airport, situated around 30 minutes north of the city, likewise fills in as a noteworthy Bangkok travel center.
