

Global Summit on

RADIATION THERAPY AND TARGETED TUMORS

April 22-23, 2019 | Vancouver, Canada

INVITATION

Dear Attendees,

We are delighted to welcome you to the **Global Summit on Radiation Therapy and Targeted Tumors** which is scheduled in the month of **April 22-23, 2019** at **Vancouver, Canada** organized by Conference Series LLC Ltd in collaboration with generous support and cooperation from enthusiastic academicians and editorial Board Members.

The conference, titled **“Targeting Cancer Metabolism to Improve Radiotherapy”** will be held at Vancouver, Canada. Radiation Therapy 2019 intended to bring together basic science researchers working in tumor metabolism, radio-biologists, radiologists and radiation oncologists to explore the interface between tumor metabolism and the response to radiotherapy.

Radiation Therapy 2019 foster the exchange of knowledge and new ideas among scientists dedicated to tumor or cancer research, provide training opportunities for the next generation of cancer researchers, and increase public understanding of cancer. The mission of the conference is to prevent and cure cancer through research, education, communication, and collaboration.

We look forward to personally welcoming you to Vancouver this April.

Sincerely,
Radiation Therapy 2019 | Organizing Committee

MARKET ANALYSIS

The global market for radiotherapy is broadly segmented on the basis of location of radiation application, type of cancer and specific technology employed. Based on the severity of the cancer, radiation beam is applied externally, internally or systemically. Radiation beams which are internally applied vary from low dose to high dose therapy based on the requirement. For external application of radiation beam the main technologies available are 3D conformal radiotherapy, adaptive radiation therapy, tomotherapy, image guided and intensity modulated radiation therapy. In gynecological, penile, esophageal and cervical cancers internal radiotherapy finds greater application while external radiotherapy treatments are used in breast, prostate, head, spine, neck, lung and brain cancers. The latest developments in implementation of CT aided intensity modulated radiotherapy and image guided techniques are expected to fuel market growth throughout the forecast period.
