About Hong Kong

Hong Kong, officially the Hong Kong Special Administrative Region of the People’s Republic of China, is an autonomous territory in China, south of the mainland Chinese province of Guangdong and east of the former Portuguese colony and fellow Special Administrative Region (SAR) of Macao. Hong Kong has created from a little angling town in the 1800s into a dynamic and exciting 21st century cosmopolitan city. It is a clamouring seaside city loaded with noteworthy elevated structures, and a combination of eastern and western societies. It gladly declares itself to be ‘Asia’s World City’ and remains a key door to China. Hong Kong is without a doubt one of the busiest intersections amongst China and whatever is left of the world for business voyagers. Aside from gatherings and meetings, it is likewise a best visitor goal in Asia with its draw of shopping and plenty of feasting choices. However Asia’s worldwide city is something other than gatherings, nourishment and shopping. It’s geology and special mix of East and West introduces a smorgasbord of Chinese conventions and traditions, amusement parks, neighbourhood food and verdant wide open to excite the guest for a considerable length of time.
