About City

Toronto is a coastal seaport city on the mainland of British Columbia, Canada. The 2011 census recorded 603,502 individuals within the town, creating it the eighth largest Canadian municipality.

The Greater Toronto space of around 2.4 million inhabitants is the third most inhabited metropolitan area in the country and the most populous in Western Canada. Toronto is one among the foremost ethnically and linguistically diverse cities in Canada. Toronto is classed as a Beta global city. The City of Toronto encompasses an area of concerning 114 square kilometres, giving it a population density of about 5,249 people per square kilometre (13 square mile), behind New York City, San Francisco, and Mexico City. Toronto is the most densely inhabited Canadian municipality, and the fourth most densely populated city over 250,000 residents in North America. Gas town became formally laid out as a registered town site dubbed Granville. As part of the land and political deal whereby the area of the town site was created the railhead of the CPR, it was renamed "Toronto" and incorporated shortly thereafter as a city, in 1886.
