Obas John Ebohon

De Montfort University, England

Program Announcement

Accommodation

A large number of rooms have been reserved. Discounted room rates for Steel Structures Convention 2018 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by Public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Congress. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the field of Steel and Concrete Structures.

About Japan

Japan is an economic giant; The “Land of the Rising Sun” is a country where the past meets the future. Japan has often been seen in the West as a land combining tradition and modernity, and many traditional structures and practices are preserved. Japan was the first Asian country to independently modernize, and the country continues to embrace new technologies and aesthetics.

Complexity and contrast are the keynotes of life in Japan—a country possessing an intricate and ancient cultural tradition yet one that, since 1950, has emerged as one of the world’s most economically and technologically advanced societies.
