

TENTATIVE PROGRAM

TELEHEALTH 2022

INTERNATIONAL CONFERENCE ON
**TELEMEDICINE AND
DIGITAL HEALTH**

January 24-25, 2022 | Prague, Czech Republic

PHILOSOPHY AND VISION

Today, telehealth is one of the fastest growing sectors in healthcare especially during COVID-19 which has enhanced and accelerated the role that telehealth plays within our healthcare system. It is reshaping the landscape of healthcare delivery across the globe, and is being recognized as the future of global healthcare. Telehealth addresses and achieves the basic tenants of Healthcare Reform: providing the population with access to improved and convenient, high quality patient centric care, enhancing outcomes, while reducing per capita expenditures. Studies have shown that the benefits of telehealth include significantly improved outcomes, efficient care delivery as well as reduction in mortality rates, hospitalizations, length of stay, readmissions and healthcare costs.
