

5th World Congress on

Virology

December 07-09, 2015 Atlanta, USA

Day 1 December 07, 2015

08:00-08:30 Registrations

Grand Ball Room - 2

08:30-09:00 Opening Ceremony

	Keynote Forum
09:00-09:45	Title: Stories Behind The Cocktail and Synergism
	Ting-Chao Chou, Founder and President, PD Science LLC, USA
09:45-10:30	Title: Emerging Human Pathogens: Human Herpes Virus-6 (HHV-6) & Human Herpesvirus-7 (HHV-7)
	Dharam Ablashi, HHV-6 Foundation, KHG fiteBac® Technology, USA
10:30-11:00	Title: Impact of Maternal HIV Infection on Cord Blood Passive Antibody Levels Against Protein and Polysaccharide Antigens in Exposed Versus Unexposed Uninfected Infants
	Shahana Choudhury, Meharry Medical College, USA

Group Photo & Coffee Break @ Foyer: 11:00-11:15

Sessions: General Virology and Basic Science

Clinical and Neuro Virology

Respiratory and Emerging/Re-emerging Viruses

Agriculture and Plant Virology

Viral Hepatitis

Session Chair: Sita Awasthi, University of Pennsylvania, USA

Session Co chair: Hua Zhu, Rutgers University, USA

	1111 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	
	Session Introduction	
11:15-11:35	Title: Review of Virus-Like Particle Production, Characterization & Comparability for Contemporary Vaccines	
	Michael W Washabaugh, MedImmune, USA	
11:35-11:55	Title: Replication Competent Viral Vectors for Vaccine Development	
11:33-11:33	Farshad Guirakhoo, GeoVax Inc, USA	
11:55-12:15	Title: Characterization of Norovirus in Lebanon among hospitalized children less than 5 years old	
11:55-12:15	Nada Melhem, American University of Beirut, Lebanon	
10.15 10.25	Title: Viral Diseases of Ajmer Rajasthan India	
12:15-12:35	Rashmi Sharma, SPC GCA, India	
10.25 10.55	Title: Role of ORF 7 in Varicella Zoster Virus Tissue Tropism and Potential for Novel Vaccine	
12:35-12:55	Hua Zhu, Rutgers University, USA	
12:55-13:15	Title: New Insights into the Bugs in the Airway of HIV-infected Children with Lung Disease	
	Robin Green, University of Pretoria, South Africa	
13:15-13:35	Title: tRNA retrograde transport in nuclear import of HIV-1	
	George Adigbli, University College London, UK	

Symposium on

14:15-15:15

Hepatitis C: Epidemiology and Therapy Snapshot

By: Abdelouaheb Benani, Pasteur Institute of Morocco, Morocco & Brian L Pearlman, Atlanta Medical Center, USA

Session Chair: Farshad Guirakhoo, GeoVax Inc, USA

Session Co chair: C. Yong Kang, Western University, Canada

Session Co Chair. C. Tong Kang, Western Onliversity, Canada	
	Session Introduction
15:15-15:35	Title: Prevalence, genetic drift of haemagglutinin, and antiviral resistance of influenza viruses circulating in Shanghai in children during 2009-2013
	Jiehao Cai, Fudan University, China
15:35-15:55	Title: Adenovirus Infection in Children with Acute Lower Respiratory Tract Infections in Beijing, China, 2007 to 2012
	Chunyan Liu, Beijing Children's Hospital, Capital Medical University, China
15:55-16:15	Title: The HBx oncoprotein of hepatitis B virus promotes cell transformation by stimulating rDNA transcription and ribosome biogenesis
	Vijay Kumar, International centre for Genetic Enginereing and Biotechnology, India
	Coffee Break @ Foyer 16:15-16:30
16:30-16:50	Title: Molecular Studies on Tomato Leaf Curl Virus (TLCV) in Bara, Sudan
	Sana Khalifa Mukhtar Badawi, University of Kordofan, Sudan
16:50-17:10	Title: Hepatitis C – A readily curable disease
	Syed Amir Abbas, The Muhammad Hospital, Pakistan
17:10-17:30	Title: The Perpetual Challenge of Emerging and Re-emerging Infectious Diseases in Egypt
	Gamal El Sawaf, Alexandria University, Egypt
17:30-17:50	Title: MERS the epidemic whirlwind
	Ilham Qattan, Taibah University, Saudi Arabia
Panel Discussion	

	D 0 D	
	Day 2 December 08, 2015	
	Grand Ball Room - 2	
	Keynote Forum	
08:00-08:25	Title: DAS181: A Novel Host Directed Approach to Prevent and Treat Virus Infections	
06:00-06:25	Ronald Moss, Ansun Biopharma, USA	
00.05.00.50	Title: Immunogenicity evaluation of a subunit vaccine for genital herpes in Rhesus macaques	
08:25-08:50	Sita Awasthi, University of Pennsylvania, USA	
Sessions: Therapeutic Approaches and Targets for Viral Infections		
Veterinary Virology		
Viral Immunology		
Organ specific Cancer and Tumor virology		
Session Chair: Sang-Moo Kang, Georgia State University, USA		
Session Co-chair: Khaled Barakat, University of Alberta, Canada		
	Session Introduction	
08:50-09:10 Title: New approaches for developing viral vaccines against influenza and respiratory syncytial virus		
Sang-Moo Kang, Georgia State University, USA		

09:10-09:30	Title: A new antiviral therapeutic strategy for the prevention of rotavirus infections	
07.10-07.50	Rebecca Parr, Stephen F Austin State University, USA	
09:30-09:50	Title: Rational Design Of Immune Checkpoints' Small Molecule Inhibitors	
	Khaled Barakat, University of Alberta, Canada	
	Title: Nuclear Transport Inhibitors Alter Capsid Subcellular Localisation and Replication of	
09:50-10:10	Venezuelan Equine Encephalitis Virus and Related New World Alphaviruses	
	Kylie Wagstaff, Monash University, Australia	
	Coffee Break @ Foyer 10:10-10:30	
	Title: Fixed dose combination anti-retroviral drugs had comparable immunological, virological and	
10:30-10:50	adherence potential with single drug combinations	
	Yohanna Kambai Avong, Institute of Human Virology, Nigeria	
	Title: The Epidermal Growth Factor Receptor Regulates Cofilin Activity and Promotes Transmissible	
10:50-11:10	Gastroenteritis Virus Entry into Intestinal Epithelial Cells	
	Qian Yang, Nanjing Agricultural University, China	
11:10-11:30	Title: Dromedary camels and the transmission of MERS coronavirus (MERS-CoV)	
	Maged Gomaa Hemida, King Faisal University, Saudi Arabia	
11:30-11:50	Title: 13-2- Bovine Herpes Virus-1 (BHV-1): Current Scenario of South and East Asia	
	Sharad Kumar Yadav, Uttar Pradesh Pandit Deen Dayal Upadhayay Vishvidhyalaya, India	
11:50-12:10	Title: Enteric viruses in chicken enteritis	
11.50-12.10	Naresh Jindal, Lala Lajpat Rai University of Veterinary and Animal Sciences, India	
12:10-12:30	Title: Whole Genomic Analysis of Rotaviruses	
12:10-12:30	Souvik Ghosh, University School of Veterinary Medicine, West Indies	
Lunch Break @ Foyer 12:30-13:10		
	Lunch Break @ Foyer 12:30-13:10	
Session Cha	ir: C Yong Kang, Western University, Canada	
	ir: C Yong Kang, Western University, Canada	
	ir: C Yong Kang, Western University, Canada hair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia	
	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA	
Session Co-c	ir: C Yong Kang, Western University, Canada shair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses	
Session Co-c	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA	
13:10-13:40	ir: C Yong Kang, Western University, Canada shair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on	
Session Co-c	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats

13:10-13:40 13:40-14:10	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IFI16 recognition of hepresviral genomes and inflammasome and IFN-β responses	
13:10-13:40 13:40-14:10 14:10-14:30	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IF116 recognition of hepresviral genomes and inflammasome and IFN-β responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA	
13:10-13:40 13:40-14:10 14:10-14:30	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IFI16 recognition of hepresviral genomes and inflammasome and IFN-β responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA Title: Engineering of Highly Efficient Recombinant Viral Vectors for Development of Prime-Boost	
13:10-13:40 13:40-14:10 14:10-14:30	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IF116 recognition of hepresviral genomes and inflammasome and IFN-\(\beta\) responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA Title: Engineering of Highly Efficient Recombinant Viral Vectors for Development of Prime-Boost Vaccines Against Viral Diseases C Yong Kang, Western University, Canada Title: Transcription Profiling of CD4+ T Cells in Rhesus Macaques Infected with Simian-Human	
13:10-13:40 13:40-14:10 14:10-14:30	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IFI16 recognition of hepresviral genomes and inflammasome and IFN-\$\beta\$ responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA Title: Engineering of Highly Efficient Recombinant Viral Vectors for Development of Prime-Boost Vaccines Against Viral Diseases C Yong Kang, Western University, Canada	
13:10-13:40 13:40-14:10 14:10-14:30	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IF116 recognition of hepresviral genomes and inflammasome and IFN-\(\beta\) responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA Title: Engineering of Highly Efficient Recombinant Viral Vectors for Development of Prime-Boost Vaccines Against Viral Diseases C Yong Kang, Western University, Canada Title: Transcription Profiling of CD4+ T Cells in Rhesus Macaques Infected with Simian-Human	
13:10-13:40 13:40-14:10 14:10-14:30 14:30-14:50	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IFI16 recognition of hepresviral genomes and inflammasome and IFN-\$\beta\$ responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA Title: Engineering of Highly Efficient Recombinant Viral Vectors for Development of Prime-Boost Vaccines Against Viral Diseases C Yong Kang, Western University, Canada Title: Transcription Profiling of CD4+ T Cells in Rhesus Macaques Infected with Simian-Human Immunodeficiency Virus and Re-challenged with SIVmac251	
13:10-13:40 13:40-14:10 14:10-14:30	ir: C Yong Kang, Western University, Canada chair: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IFI16 recognition of hepresviral genomes and inflammasome and IFN-β responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA Title: Engineering of Highly Efficient Recombinant Viral Vectors for Development of Prime-Boost Vaccines Against Viral Diseases C Yong Kang, Western University, Canada Title: Transcription Profiling of CD4+ T Cells in Rhesus Macaques Infected with Simian-Human Immunodeficiency Virus and Re-challenged with SIVmac251 Hye Kyung Chung, Advanced BioScience Laboratories, USA	
13:10-13:40 13:40-14:10 14:10-14:30 14:30-14:50	ir: C Yong Kang, Western University, Canada Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IFI16 recognition of hepresviral genomes and inflammasome and IFN-\$\beta\$ responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA Title: Engineering of Highly Efficient Recombinant Viral Vectors for Development of Prime-Boost Vaccines Against Viral Diseases C Yong Kang, Western University, Canada Title: Transcription Profiling of CD4+ T Cells in Rhesus Macaques Infected with Simian-Human Immunodeficiency Virus and Re-challenged with SIVmac251 Hye Kyung Chung, Advanced BioScience Laboratories, USA Title: Mechanisms of apoptosis induced in immune cells directly od indirectly by virus infection	
13:10-13:40 13:40-14:10 14:10-14:30 14:30-14:50 14:50-15:10	Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IFI16 recognition of hepresviral genomes and inflammasome and IFN-β responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA Title: Engineering of Highly Efficient Recombinant Viral Vectors for Development of Prime-Boost Vaccines Against Viral Diseases C Yong Kang, Western University, Canada Title: Transcription Profiling of CD4+ T Cells in Rhesus Macaques Infected with Simian-Human Immunodeficiency Virus and Re-challenged with SIVmac251 Hye Kyung Chung, Advanced BioScience Laboratories, USA Title: Mechanisms of apoptosis induced in immune cells directly od indirectly by virus infection Pavel Bostik, Charles University Medical School and FMHS, Czech Republic Coffee Break @ Foyer 15:30-15:50 Title: Triterpen saponins isolated from plants indigenous to Kazakhstan as efficient adjuvants for	
13:10-13:40 13:40-14:10 14:10-14:30 14:30-14:50 14:50-15:10	Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IFI16 recognition of hepresviral genomes and inflammasome and IFN-β responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA Title: Engineering of Highly Efficient Recombinant Viral Vectors for Development of Prime-Boost Vaccines Against Viral Diseases C Yong Kang, Western University, Canada Title: Transcription Profiling of CD4+ T Cells in Rhesus Macaques Infected with Simian-Human Immunodeficiency Virus and Re-challenged with SIVmac251 Hye Kyung Chung, Advanced BioScience Laboratories, USA Title: Mechanisms of apoptosis induced in immune cells directly od indirectly by virus infection Pavel Bostik, Charles University Medical School and FMHS, Czech Republic Coffee Break @ Foyer 15:30-15:50 Title: Triterpen saponins isolated from plants indigenous to Kazakhstan as efficient adjuvants for mucosal immunization	
13:10-13:40 13:40-14:10 14:10-14:30 14:30-14:50 14:50-15:10	Session Introduction Special Lecture on The Antimicrobial Compound, K21, Inhibits Replication of Enveloped and Non-Enveloped DNA and RNA Viruses By: Dharam Ablashi, KHG fiteBac® Technology, HHV-6 Foundation, USA Symposium on The Current Emerging and Re-emergent Viral Diseases Threats By: Maged Gomaa Hemida, King Faisal University, Saudi Arabia Title: Nuclear innate sensor IFI16 recognition of hepresviral genomes and inflammasome and IFN-β responses Bala Chandran, Rosalind Franklin University of Medicine and Science, USA Title: Engineering of Highly Efficient Recombinant Viral Vectors for Development of Prime-Boost Vaccines Against Viral Diseases C Yong Kang, Western University, Canada Title: Transcription Profiling of CD4+ T Cells in Rhesus Macaques Infected with Simian-Human Immunodeficiency Virus and Re-challenged with SIVmac251 Hye Kyung Chung, Advanced BioScience Laboratories, USA Title: Mechanisms of apoptosis induced in immune cells directly od indirectly by virus infection Pavel Bostik, Charles University Medical School and FMHS, Czech Republic Coffee Break @ Foyer 15:30-15:50 Title: Triterpen saponins isolated from plants indigenous to Kazakhstan as efficient adjuvants for	

16:10-16:30	Title: E6 of HPV-16-variants induces invasive capacity of C-33A: Ezrin as regulator of this process
	Miguel Angel Mendoza Catalan, Autonomous University of Guerrero, Mexico
16:30-16:50	Title: Medical application of a nanocapsule derived from a viral capsid protein
	Masaaki Kawano, Saitama Medical University, Japan
	Title: Prevalence of Hepatitis B and C Viruses Among Human Immunodefieciency Virus Infected
16:50-17:10	Children in Northern Nigeria
	Grace Pennap, Nasarawa State University, Keffi, Nigeria
	Poster Presentations @ Foyer 16:00-17:00
PVC-101	Title: Occurrence of diverse dsRNA mycoviruses in Trichoderma spp. causing green mold disease
	of shiitake Lentinula edodes
	Dae-Hyuk Kim, Chonbuk National University, Korea
PVC-102	Title: Comparison of promoter activities amongst different Merkel cell polyomavirus isolates
	Ibrahim Abdulsalam, University of Tromsø, Norway
	Title: Knockdown of NS1 protein by small interfering RNA suppressed NS1 but did not change
PVC-103	levels of IFN mRNAs in the cells and mice infected with influenza A virus
	Tatiana Betakova, Institute of Virology, Slovak Republic
PVC-104	Title: Murine gammaherpesvirus – newly discovered properties of MHV-68
	Marcela Kudelova, Institute of Virology, Slovak Republic
DVC 105	Title: Identification of genetic and proteomic biomarkers of immune reconstitution inflammatory
PVC-105	syndrome in HIV+ patients who begin antiretroviral therapy
	Lucero Ramon-Luing, Laboratory of Integrative Immunology, Mexico Title: A focused siRNA screen for cellular membrane-associated proteins involved in viral
PVC-106	replication
1 46-100	Glen R Gallagher, University of Massachusetts Medical School, USA
	Title: Chimpanzee adenovirus expressing HA-targeting artificial microRNA protects mice against
PVC-107	avian influenza virus, H5N1
	Xinying Tang, Chinese Academy of Sciences, China
	Title: Gene Therapy for Colorectal Cancer Using Adenovirus-Mediated Full-length Antibody
PVC-108	Cetuximab
	Man Xing, Chinese Academy of Sciences, China
	Title: Epidemiological and virological characterization of influenza A/H3N2 viruses during five
PVC-109	seasons (2010/2011-2014/2015) in Korea
	Joo-Yeon Lee, Korea Centers for Disease Control and Prevention, South Korea
	Title: Improvement and Application of Nested-PCR technique using consensus-degenerate primers
PVC-110	to detect human herpesvirus in plasma samples from Hematopoietic Stem Cell Transplantation
	(HSCT) patients Talita Cristina Dellariva, State University of Campinas, Brazil
	Title: Design and synthesis of selective, irreversible inhibitors of HAT protease- promising drug
PVC-111	target for influenza treatment
176-111	Marcin Skorenski, Wroclaw University of Technology, Poland
9_9_9_9_	Title: Isolation of influenza viruses from swine in Kazakhstan
PVC-112	Nailya G Klivleyeva, Institute of Microbiology and Virology, Kazakhstan
	Title: Evaluation of cytotoxicity and antiviral effect of new oseltamivir analogues against
PVC-113	influenza A virus
	Rocio Neri Bazan, ESM-IPN Laboratorio de Medicina de Conservación, Mexico
	Title: The Association between Interleukin-28B Gene Single Nucleotide Polymorphism (rs8099917)
PVC-114	and the Response to Pegylated Interferon and Ribavirin Combined Therapy in Egyptian Patients
	Chronically Infected with Hepatitis C Virus
	Salwa H Gomaa, Alexandria University, Egypt

Panel Discussion

Day 3 December 09, 2015

Grand Ball Room - 2

Sessions: HIV and Other Retroviral Diseases Affecting Afro-Asian Continents

Regulatory and Economical Aspects in Virology

Recent Advances in Drug Discovery

Current Focus in Virology Research

Session Chair: Anjali Joshi, Texas Tech University Health Sciences Center, USA

Session Co chair: Marcin Sieńczyk, Wrocław University of Technology, Poland	
Session Introduction	
09:00-10:00	Symposium on Anti-Viral Drug Combination Strategies By: Ting-Chao Chou, PD Science LLC, USA & Mohammad Intakhab Alam, Zirve University, Turkey
10:00-10:20	Title: Role of CCR5 levels in HIV-1 evolution and pathogenesis
10:00-10:20	Anjali Joshi, Texas Tech University Health Sciences Center, USA
10:20-10:40	Title: The role of human microbiome in AIDS process
	Vladimir Zajac, Cancer Research Institute, Slovak Academy of Sciences, Slovak Republic
	Coffee Break @ Foyer 10:40-11:00
11:00-11:20	Title: HIV-1 production is dependent on the incorporation of Dynamin-2 by Nef
	Thatiane L Sampaio, University of Brasilia, Brazil
11:20-11:40	Title: HIV and Other Retroviral Diseases Affecting Afro-Asian Continents
	Cathy Nisha John, University of the Western Cape, South Africa
11:40-12:00	Title: Suicidal ideation among depressed people living with HIV/AIDS in Nigeria, West Africa
11.10-12.00	Shittu Rasaq Olatunji, Kwara State Specialist Hospital, Nigeria
12:00-12:20	Title: Clinical trial of antiretroviral effects of the Medicinal synthetic Aluminum-magnesium silicate
12.00-12.20	Maduike Ezeibe, Michael Okpara University of Agriculture, Nigeria
	Title: Surveillance for viral respiratory healthcare associated infections amongst inpatients in Kenyan hospitals
	Ndegwa Linus Kirimi, Infection prevention Network Kenya, Kenya
	Title: Parallel and Overlapping Infection with Hepatitis B and C Viruses in Apparently Healthy Individuals in a Northern Nigerian Village
	Grace Pennap, Nasarawa State University, Keffi, Nigeria
	Lunch Break @ Foyer 13:00-13:40
Session Chai	r: Ting-Chao Chou, PD Science LLC, USA
Session Co cl	hair: Mohammad Intakhab Alam, Zirve University, Turkey
	Session Introduction
	Title: Sexual orientation and risk factors for the transmission of Human Immunodeficiency Virus/
13:40-14:00	Acquired Immune Deficiency Syndrome
25:010:0	Dominic Abaver, Walter Sisulu University, South Africa
14:00-14:20	Title: Modeling implementation of Early Infant Male Circumcision in Rwanda: Lessons learnt
17.00-17:20	
	Chaste Karangwa, Rwanda Biomedical Center/HIV Division, Rwanda
	Chaste Karangwa, Rwanda Biomedical Center/HIV Division, Rwanda Title: Personal Protective Equipment for Healthcare Workers: Dressing in the Dark

15:00-15:20 Oleg P Zhirnov, D.I.Ivanovsky Institute of Virology, Russia Title: Targeting viral serine proteases with phosphonic inhibitors Marcin Sieńczyk, Wrocław University of Technology, Poland Title: Vecoys and becoys, newly developed nanoparticles for targeted destruction of viral and bacterial agents Mohamed El Zowalaty, Qatar University, Qatar Coffee Break @ Foyer 15:40-16 Title: Improving in the elderly the communication and availability towards vaccinal campaigns against influenza: A local project in primary health care in North East Italy Filippo De Nicolellis, Fiumcello, Friuli Venezia Giulia, Italy Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario an outbreak, in hospitals and research laboratories as well		
Oleg P Zhirnov, D.I.Ivanovsky Institute of Virology, Russia Title: Targeting viral serine proteases with phosphonic inhibitors Marcin Sieńczyk, Wrocław University of Technology, Poland Title: Vecoys and becoys, newly developed nanoparticles for targeted destruction of viral and bacterial agents Mohamed El Zowalaty, Qatar University, Qatar Coffee Break @ Foyer 15:40-10 Title: Improving in the elderly the communication and availability towards vaccinal campaigns against influenza: A local project in primary health care in North East Italy Filippo De Nicolellis, Fiumcello, Friuli Venezia Giulia, Italy Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario	14 40 15 00	Title: Metered dose inhaler containing aprotinin, a protease inhibitor, as a drug against influenza
15:00-15:20 Marcin Sieńczyk, Wroclaw University of Technology, Poland Title: Vecoys and becoys, newly developed nanoparticles for targeted destruction of viral and bacterial agents Mohamed El Zowalaty, Qatar University, Qatar Coffee Break @ Foyer 15:40-10 Title: Improving in the elderly the communication and availability towards vaccinal campaigns against influenza: A local project in primary health care in North East Italy Filippo De Nicolellis, Fiumcello, Friuli Venezia Giulia, Italy Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario an outbreak, in hospitals and research laboratories as well	300000	Oleg P Zhirnov, D.I.Ivanovsky Institute of Virology, Russia
Marcin Sieńczyk, Wroclaw University of Technology, Poland Title: Vecoys and becoys, newly developed nanoparticles for targeted destruction of viral and bacterial agents Mohamed El Zowalaty, Qatar University, Qatar Coffee Break @ Foyer 15:40-10 Title: Improving in the elderly the communication and availability towards vaccinal campaigns against influenza: A local project in primary health care in North East Italy Filippo De Nicolellis, Fiumcello, Friuli Venezia Giulia, Italy Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario an outbreak, in hospitals and research laboratories as well		Title: Targeting viral serine proteases with phosphonic inhibitors
15:20-15:40 Mohamed El Zowalaty, Qatar University, Qatar Coffee Break @ Foyer 15:40-16 Title: Improving in the elderly the communication and availability towards vaccinal campaigns against influenza: A local project in primary health care in North East Italy Filippo De Nicolellis, Fiumcello, Friuli Venezia Giulia, Italy Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario an outbreak, in hospitals and research laboratories as well		Marcin Sieńczyk, Wrocław University of Technology, Poland
Mohamed El Zowalaty, Qatar University, Qatar Coffee Break @ Foyer 15:40-16 Title: Improving in the elderly the communication and availability towards vaccinal campaigns against influenza: A local project in primary health care in North East Italy Filippo De Nicolellis, Fiumcello, Friuli Venezia Giulia, Italy Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario an outbreak, in hospitals and research laboratories as well		Title: Vecoys and becoys, newly developed nanoparticles for targeted destruction of viral and
Title: Improving in the elderly the communication and availability towards vaccinal campaigns against influenza: A local project in primary health care in North East Italy Filippo De Nicolellis, Fiumcello, Friuli Venezia Giulia, Italy Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario an outbreak, in hospitals and research laboratories as well	15:20-15:40	bacterial agents
Title: Improving in the elderly the communication and availability towards vaccinal campaigns against influenza: A local project in primary health care in North East Italy Filippo De Nicolellis, Fiumcello,Friuli Venezia Giulia, Italy Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario an outbreak, in hospitals and research laboratories as well		Mohamed El Zowalaty, Qatar University, Qatar
16:00-16:20 against influenza: A local project in primary health care in North East Italy Filippo De Nicolellis, Fiumcello,Friuli Venezia Giulia, Italy Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario an outbreak, in hospitals and research laboratories as well		Coffee Break @ Foyer 15:40-16:00
Filippo De Nicolellis, Fiumcello, Friuli Venezia Giulia, Italy Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario an outbreak, in hospitals and research laboratories as well		Title: Improving in the elderly the communication and availability towards vaccinal campaigns
Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario an outbreak, in hospitals and research laboratories as well	16:00-16:20	against influenza: A local project in primary health care in North East Italy
16:20-16:40 an outbreak, in hospitals and research laboratories as well	16:20-16:40	Filippo De Nicolellis, Fiumcello,Friuli Venezia Giulia, Italy
		Title: Biosafety challenges in face of new or emerging viral pathogens specially in the scenario of
Pedro Brandão dos Santos Pedrosa, Leibniz University of Hanover, Germany		an outbreak, in hospitals and research laboratories as well
Total Diamate des cames I career, Estatus Similari, et Transver, Commany		Pedro Brandão dos Santos Pedrosa, Leibniz University of Hanover, Germany
