Invitation

Dear Colleagues,

Conference Series LLC welcomes you to attend **World Congress on Women Oncology & Care** held during **November 20-21, 2019 Tokyo, Japan** with the theme “**Challenges in Early detection treatment and prevention possibilities**”. This international meet (Women Oncology 2019) anticipates hundreds of delegates including Keynote speakers, Oral presentations by renowned speakers and poster presentations by students besides delegates around the world. This conference perhaps a giant event that creates an ideal platform to share expertise addressing current advancements involved in Women Oncology & Care. It will be a wonderful opportunity for all the attendees as it provides an international networking opportunity to collaborate with the world class Oncology and Care associations.

With Regards,

Women Oncology 2019

Venue

Tokyo, Japan

Accommodation

A large number of rooms have been reserved. Discounted room rates for Women Oncology 2019 participants are proposed. Only reservations made through the Conference will benefit these rates. The Congress Center can be easily reached by public transportation.

Exhibition and Sponsorship

An Exhibition will be held concurrently with the Conference. The coffee break and lunch areas will be located adjacent to the booths. Thanks to exhibitors from all over the world, attendees will have a complete overview of new findings in the fields of Women Oncology & Care Care.

About Tokyo

Japan is an economic giant; The “Land of the Rising Sun” is a country where the past meets the future. Japan has often been seen in the West as a land combining tradition and modernity, and many traditional structures and practices are preserved. Japan was the first Asian country to independently modernize, and the country continues to embrace new technologies and aesthetics. Complexity and contrast are the keynotes of life in Japan—a country possessing an intricate and ancient cultural tradition yet one that, since 1950, has emerged as one of the world’s most economically and technologically advanced societies. Heavy emphasis is placed on education, and Japan is one of the world’s most literate countries. Japan sought to become a modern industrialized nation and pursued the acquisition of a large overseas empire, initially in Korea and China. The Japanese rank second only to the United States in spending on scientific research and technology development. However, in Japan, 80% of all research and development (R&D) is carried out by industry, in contrast to the United States, where industry undertakes about half of all R&D (the US government supports the rest).
