# Tentative Program

## 2<sup>nd</sup> Annual Congress on Medicine

March 23-24, 2020 Yokohama, Japan

Theme: Research and Innovations in Medicine to Save Lives

\*\*\*For available speaker slots\*\*\*

[worldmedicine@asiapacificmeets.com](mailto:worldmedicine@asiapacificmeets.com)

**19+** Interactive  
Sessions

**15+** Keynote  
Lecture

**75+** Plenary  
Lecture

**5+** Workshop

### Conference Secretariat

Conference Series LLC Ltd, 47 Churchfield road, London W3 6AY. +44-203-7690-972

# 2<sup>nd</sup> Annual Congress on Medicine

March 23-24, 2020 Yokohama, Japan

## Day-01 March 23, 2020

Time	Session
08:30-09:30	Registrations
09:30-11:00	Keynote Forum
11:00-11:20	Group Photo & Network & Refreshments Break*
11.20-13.00	Pharmaceutical Sciences   Surgery   Alternative Medicine   Medicinal Chemistry   Healthcare   Cancer   Science   Neuroscience
13:00-13:45	Lunch Break**
13:45-16:00	Regenerative Medicine   Reproductive Health   Nursing   Immunology   Infection   Nutrition
16:00-16:15	Network & Refreshments Break*
16:15-17:00	Nutrition   Clinical Research   Medical Education   Medical Innovations

Day Concludes

## Day-02 March 24, 2020

Time	Session
08:30-09:30	Registrations
09:30-10:30	Keynote Forum
11:00-11:20	Group Photo & Network & Refreshments Break*
11:20-13:00	Nutrition   Clinical Research   Medical Education   Medical Innovations
13:00-13:45	Lunch Break**
13:45-16:00	Pharmaceutical Sciences   Surgery   Alternative Medicine   Medicinal Chemistry   Healthcare   Cancer   Science
16:00-16:15	Network & Refreshments Break*
16:15-17:00	Neuroscience   Regenerative Medicine   Reproductive Health   Nursing   Immunology   Infection
17:00-18:00	Poster Presentations

Day Concludes

Award Ceremony

Conference Concludes

# Major Scientific Sessions

- Internal Medicine
- Pharmaceutical Sciences
- Surgery
- Alternative Medicine
- Medicinal Chemistry
- Healthcare
- Cancer Science
- Neuroscience
- Regenerative Medicine
- Reproductive Health
- Nursing
- Immunology
- Infection
- Nutrition
- Clinical Research
- Medical Education
- Medical Innovations

## Best Poster Award

- You will be given about 5-7 minutes to present your poster including questions and answers. Judges may pose questions during the evaluation of the poster
- Judges will even evaluate the student's enthusiasm towards their study, interest and knowledge in the area of their research
- The winners will be announced at the closing ceremony of the conference. The decision of the winner will be withdrawn if the winner/winners is/are not present at the time of announcement
- Apart from the judging time you may also be present at the poster to share your research with interested delegates

## Young Researchers Forum

- Present your research through oral presentations
- Learn about career development and the latest research tools and technologies in your field
- This forum will give pertinent and timely information to those who conduct research and those who use and benefit from research
- Develop a foundation for collaboration among young researchers
- The forum will provide an opportunity for collegial interaction with other young investigators and established senior investigators across the globe
- Interact and share ideas with both peers and mentors

# 2<sup>nd</sup> Annual Congress on Medicine

March 23-24, 2020 Yokohama, Japan

## Accepted Abstracts

### **Title: Computed Tomography imaging has high diagnostic yield for unintentional weight loss at Counties Manukau District Health Board**

**Katherine Given**, Department of Gastroenterology, Middlemore Hospital, Auckland, New Zealand

**Abstract:** Unintentional weight loss poses a diagnostic dilemma due to a wide differential diagnosis. Following basic diagnostic investigations, cross-sectional imaging such as CT chest, abdomen and Pelvis (CT-CAP) is often performed with the aim of excluding malignancy. There are no guidelines on which patients should follow this pathway. The purpose of this audit is to evaluate the yield of CT-CAP in these patients, identify predisposing factors for positive findings, and identify inequalities that may exist in our multicultural population.

### **Title: Integrative Medicine Approach to Caring Autism Spectrum Disorder (ASD) with Gastrointestinal**

**Yu-Lan Chiang**, Red House Children's Hospital, Longyou, China

**Abstract:** No two children with ASD are alike and no single care plan is one size-fits-all. In this respect, studies have shown that a majority of ASD children display gastrointestinal symptoms, which impacts neurodevelopment during early childhood in susceptible subjects by way of gut-brain axis. Thus, we performed an uncontrolled pilot study to assess the efficacy of Integrative Medicine (IM) approach, based on specific carbohydrate diet-diary free diet, bio-medical, lifestyle, behavioural, music and sand art intervention, to caring five children, ages 4-6, diagnosed with an ASD with gastrointestinal symptoms for 12 weeks. All completed a 3-day washout period with Dietary Guideline for Chinese resident. All Parents were signed informed consent forms.

### **Title: Gaba agonist baclofen increases beta cell Mass and c peptide level in patients with type 1 diabetes**

**Mahmoud younis**, Kafr El Sheikh General Hospital

**Abstract:** At the onset of T1D, more than 70% of  $\beta$ -cells are destroyed (2), whereas the residual  $\beta$ -cells most likely represent the only reservoir for the regeneration of islet  $\beta$ -cell mass (3). It was found that treatment of rodents with GABA (Gamma-Amino Butyric Acid) could convert glucagon-producing cells to large numbers of  $\beta$ -like cells seen both as increased islet size and number. Importantly, this dramatic regeneration could reverse severe diabetes induced by the  $\beta$  cell toxin streptozocin.

### **Title: Silent Constipation: A Potential Killer**

**Naznin Esphani**, University of Maryland Medical Centre, Baltimore, Maryland, USA

**Abstract:** Constipation is commonly occurring symptom, and often distressing to patients, when left untreated or undertreated, it may be associated with severe morbidity and/or occasional mortality. Constipation has to be revisited and clinicians/medical residents/students/nursing students/nursing staff, other ancillary medical staff has to get familiarized with term "Silent Constipation".

# 2<sup>nd</sup> Annual Congress on Medicine

March 23-24, 2020 Yokohama, Japan

## Title: Complete Heart Block in Scrub Typhus

**Preeti Dalal**, Govt. Medical College and Hospital, Chandigarh

**Abstract:** Scrub typhus is an acute febrile, infectious illness caused by rickettsia O. Tsutsugamushi. It was first described in detail by Hashimoto from Japan in 1810. Scrub typhus is endemic to a part of world known as the "Tsu-tugamushi triangle" which extends from northern Japan and far-eastern Russia in the north, to northern Australia in the south, and to Pakistan and Afghanistan in the west. In India rickettsial infections have been documented from the states of Jammu and Kashmir, Himachal Pradesh, Uttarakhand, Rajasthan, Assam, West Bengal, Maharashtra, Kerala and Tamil Nadu.

## Title: The role and effectiveness of cupping therapy (Hijama) in the management of Pain due to Migraine

**Muhammad Amin Baig**, Regimental Therapies at Government Recognized Institute of Unani Medicine (Ajmal Tibbia College Rawalpindi) Pakistan

**Abstract:** Background: Migraine is common headache disorder and can lead to disability. Mostly analgesics are being prescribed having numerous side effects. Wet Cupping is the part of Regimental therapy as a treatment mode of Migraine disease in Unani system of Medicine.

## Title: Initial experience with intragastric balloon lexbal® in the treatment of patients with mild to moderate obesity (type I-II)

**Fernando Robledo**, Buenos Aires, Argentina

**Abstract:** Conclusions: Treatment with intragastric balloon, along with a nutritional monitoring allows us to re-educate the patient, and change their eating habits. • Just for gradual diet, and to adapt each phase as tolerated by the patient, helps us to improve dietary behavior and facilitates greater weight loss The intragastric balloon is a safe, well tolerated, with few adverse effects and relatively simple in the hands accustomed to endoscopic practice.

## Title: Effect of Ethanolic Leaf Extract of Moringa oleifera on Aluminum-induced Anemia in White Albino Rats

**Mohamed E. Shayoub**, Department of Pharmaceutics, Faculty of Pharmacy

**Abstract:** The study aimed to investigate the effect of ethanolic leaf extract of Moringa oleifera on AlCl<sub>3</sub>-induced anemia in albino rats. Twenty-four rats (average body weight 284 g) were divided into four groups each of six: group (A) was provided with 0.5 mg/kg body weight of AlCl<sub>3</sub>, group (AM) with AlCl<sub>3</sub> and 10 minutes later with M. oleifera extract (300 mg/kg body weight), group (M) with M. oleifera extract (300 mg/kg) alone and the control group (C) with normal saline solution only.

## Title: Prescription usage of antibiotics in geriatric patients

**Tambe Daniel.A**, East West College of Pharmacy, Bengaluru, Karnataka, India

**Abstract:** Geriatric patients are patients with impaired overall functions. There is no set age, but usually more than 60 years old with chronic illness, physical impairment or cognitive impairment. Evidence shows high prevalence of inappropriate usage of antibiotics in the special population such as geriatrics, which could lead to increase risk of adverse drug reactions, mortality, morbidity, increase cost of treatment and increase antibiotic resistance.

# 2<sup>nd</sup> Annual Congress on Medicine

March 23-24, 2020 Yokohama, Japan

## **Title: Exploration of Flavonoid as an Adjuvant Therapy against Breast Cancer**

**Ramsha Khalid**, University of Karachi , Pakistan

**Abstract:** Breast Cancer, one of the leading causes of death in females, is a complex multifactorial disorder, with the pathophysiology and molecular mechanism still not completely unraveled. It can be hypothesized that the dysregulation of breast cancer associated proteins can potentially lead to malignancies. It has been identified that the B-cell lymphoma 2 (BCL2), eukaryotic initiation factor-4A (EIF4aI) and tumor suppressor p53 proteins are chiefly associated with breast tumorigenesis.

## **Title: Contained Rupture of Superior Mesenteric Artery Pseudoaneurysm as a Complication of Aortic Valve Endocarditis in a 24-year-old Female with Rheumatic Heart Disease: A Case Report**

**Romelie Tuplano**, Philippine Heart Center, Quezon City 0850, Philippines

**Abstract:** A 24-year-old female known with rheumatic heart disease was admitted due to recurrent fever, arthritis and easy fatigability and diagnosed with reactivation of rheumatic fever and infective endocarditis of aortic valve. Culture-guided antibiotics were given. In addition, palpable abdominal mass was also noted. CT aortogram was done showing large aneurysm arising from one of the distal branches of the superior mesenteric artery with contained rupture with chronic intermittent hemorrhage.

# 2<sup>nd</sup> Annual Congress on Medicine

March 23-24, 2020 Yokohama, Japan

## About Yokohama

Yokohama, a Japanese city south of Tokyo, was one of the first Japanese ports opened to foreign trade, in 1859. It contains a large Chinatown with hundreds of Chinese restaurants and shops. It's also known for Sankei-en Garden, a botanical park containing preserved Japanese residences from different eras, and the seaside Minato Mirai district, site of the 296m Landmark Tower.

Yokohama's population of 3.7 million makes it Japan's largest city after the special wards of Tokyo. Yokohama developed rapidly as Japan's prominent port city following the end of Japan's relative isolation in the mid-19th century and is today one of its major ports along with Kobe, Osaka, Nagoya, Hakata, Tokyo, and China.

Yokohama features a humid subtropical climate with hot and humid summers and chilly winters. Weather-wise, Yokohama has a mixed bag of rain, clouds and sun, although in winter, it is surprisingly sunny, more so than Southern Spain.

### Important Dates

Abstract submission opens: [July 31, 2019](#)

Registration opens: [July 31, 2019](#)

Early bird registration: [September 22, 2019](#)

On spot registration: [March 23, 2020](#)

Registration closes: [March 23, 2020](#)
