SS(3,226nt)	2.26	2.11	3.50	1.95	9.82
Alu	4.93	5.21	4.32	1.34	15.80
Line	4.74	2.37	2.84	4.27	14.22

Numbers represent per 100 nucleotides

Functions of Alu elements

- 1) DNA replication
hY1,2,3,4 and 5
- 2) Transposition and gene recombination
Self replication, Integration
- 3) Gene expression at the Transcription
 - (a) Alu in promoters; ADA Gene Alu deletion→SID
 - (b) Alu in exons; Factor IX gene exon 5→Hemophilia B
 - (c) Alu in introns; NF1 gene intron 5 (Sb1)→
Neurofibromatosis
 - (d) Alu in control region;
Alu in LCR of globin genes→Thalassemia
Alu in LCR of K18 gene; ↑expression
 - (e) Alu in splicing
 - (f) Alu exonization;
ADAR2 exon8+Alu Jb (Lev-Maor et al., 2003)
- 4) Alu control at the Translation
FMRP binds BC1 and regulates neuronal mRNA translation by inhibition. Primate analog of rodent (mouse) BC1 is BC200 which was detected by RT-PCR of extract from glioma and neuronal cells. These BC1 and BC200 have complementarity to Arc, α -CaMKII and MAP1B mRNAs in cognate species and regulate dendritic development in synapsis (Zalfa et al., 2003).
- 5) Alu Binding Proteins;
Ro, La, SRP9/14 Hormone receptore, TF etc.

ESEs, 5' SS, BS & 3' SS in Alu RNAs

The ESE, 5' splice site, branch site, and 3' splice site in 4.5S RNA I and Alu elements in FMR1 gene transcript are screened by ESE finder (version 3) [Cartegni et al., (2003) NAR **31**, 3568-3571]. For this comparison, the number of motifs is calculated per 100 nucleotides. The motif patterns in Alu elements are all very much alike and the 4.5S RNA I resembles them. A difference is found in that 5' splice sites in (+) Alu are more than in (-) Alu and 3' splice sites are more in (-) Alu than in (+) Alu.

	SF2/ASF	SC35	SRp40	SRp55	Total	5' SS	BS	3' SS
Novikoff 4.5S RNA I (96 nt)	3.65	3.13	6.25	1.04	14.07	0	10.4	2.08
Human FMR1 Alu1(+)	4.96	7.54	6.35	1.59	20.44	3.97	9.13	5.56
Human FMR1 Alu4(+)	4.41	4.41	1.69	2.03	12.54	2.37	10.9	2.37
Human FMR1 Alu5(+)	5.69	5.28	4.47	1.22	16.66	4.47	8.54	2.44
Human FMR1 Alu7(+)	6.21	2.41	3.10	0.34	12.06	3.79	10.3	2.07
Human FMR1 Alu8(+)	5.21	3.47	3.82	0.69	13.19	3.47	8.68	2.43
