

Welcome Message

2nd International Microfluidics Congress

Dear Colleagues,

On behalf of the Meetings International Pte Ltd., it is my pleasure to invite all of the great scientists, academicians, young researchers, Business delegates, and students from all over the world, to attend the 2nd International Micro Fluidics Congress from May 23 to 24, 2019, in Las Vegas, USA.

Dr. Liviu Popa-Simil

The Micro fluidics congress will share recent research and cutting-edge technologies, which gains immense interest with the colossal and exuberant presence of adepts, young and brilliant researchers, business delegates, and talented student communities; to which all are very committed to excellence in nano and micro technologies and related applications, from where fluidics is a constitutive part.

The goal of the micro fluidics congress is to bring together a multi-disciplinary group of scientists and engineers from all over the world to present and exchange break-through ideas relating to the micro-nano hetero-structures where fluids perform an important role. The congress promotes top-level research and in general, globalizes quality research. Thus, making discussions and presentations more internationally competitive, and focusing attention towards recent outstanding achievements in the field of micro and nano technologies, along with future trends and needs.

The meeting brings together world-class specialists from a multitude of domains such as medicine, biology, pharmacy, industry, aerospace, defence, energy, and more, individuals belonging to universities, research laboratories, businesses and related applications, all of which are interested in the latest developments of this new challenging domain, with high impact in the future.

Since this congress covers a variety of aspects on the behaviour of fluids inside micro and nano structures and devices, from very fundamental issues to practical applications, the conference shows the current trends and future direction in the field of microfluidics. Anyone interested in future progress should attend.

We're looking forward to an excellent meeting with great scientists from different countries around the world and engage in the sharing of new and exciting results in Micro-Nano Fluidics and related devices and applications. And contrary to the slogan "What Happens in Vegas, stays in Vegas," what will happen in this Micro-fluidics Congress held in Las Vegas, USA, from May 23-24, 2019, will be known worldwide, thanks to our sponsors and publishers.

Best wishes,

Liviu Popa-Simil

Dr. Liviu Popa-Simil

Nuclear Engineer

Physicist

Director of Los Alamos Academy of Sciences.
