

Welcome Message

International Conference on Biodiversity and Ecology Restoration

May 15-16, 2019 | Brussels, Belgium

Jerome Partos

Dear all,

As a European citizen, living in Brussels, I am very happy to welcome you for this International Conference on Biodiversity and Ecology Restoration. Biodiversity has become a key issue. It is unfortunate, but not too late. In particular as Ecology Restoration is improving daily. Between sadness and hope, I am sure that, due to the presentation we are going to discover, the latter will dominate”

Best wishes,

Jerome Partos
