Dear Colleagues,

There is no imaginable reality where accidents and emergencies cease to exist. Challenges of practicing emergency medicine are expanding.

We need to identify these challenges and work together to find new tools and skills to have balance between taking care of patients and ourselves.

4th international Conference on Emergency & Personalized Medicine is great opportunity to allow us to regroup, exchange ideas and be exposed to updated research.

See you in Dubai during December 05-06, 2022.
