

## Welcome Message for International conference on Metabolomics and Systems Biology

November 12-13, 2018 | Chicago, USA

On behalf of the Organizing Committee I would like to personally welcome you to Chicago, USA to the Metabolomics 2018 conference!

The main theme of this conference celebrates the “Metabolomics: The Key for Understanding the Biological Functioning” as a metabolomics expert, such reference work is in constant use in my research work.

The tracks we offer in our conference are focusing on metabolomics and system biology. The experts in the field are going to share their research achievements with you. Metabolomics became a key tool for investigation of the biological processes. At the present time metabolomics is also of interest to clinical scientists and physicians for the reason of potential improvements in the diagnosis and treatments of human diseases. All the sessions which are selected are of global interest and fascinate future metabolomics scientist and system biologist.

I hope to see you all in Chicago on November 12-13, 2018 to enjoy the International Conference on Metabolomics and Systems Biology along with the exceptional beauty of Chicago city. Your presence is an implication towards your commitment to making positive moves in the lives of researchers, scientists, students and patients in your country and throughout the world.

Creativity is intelligence having fun!

The vision, knowledge we have is an asset to experience the discoveries. This is a path into the future of metabolomics with an immense help to the world.

Sincerely,

Vladimir Tolstikov, PhD
