

**Message from Prof Sergey Suchkov,**

Dear Colleagues, Partners, Scientists, Clinicians, and Friends,

On behalf of the Organizing committee, I cordially invite you to present and contribute your invaluable experience at 2nd world Congress on Obstetrics and Gynecology, which will be held during March 27-28, 2019 in Paris, France.

The mission of The Congress is to provide comprehensive personalized and precision care for women, emphasizing the whole patient and/or a person-at-risk. Those meetings enjoy international reputation for excellence in teaching, patient care, and research being delivered to the attendants. So, the Congress usually attracted participation from many of established leaders. This year's forum will build on that tradition, but with a more concentrated focus on generating solutions to the field's challenges. The latter would propose ways to encourage investment in innovation and stimulate the adoption of obstetrics, gynecology and family medicine in the daily practice.

The Program will cover cutting edge topics in daily practice, the most recent development and management of the rapidly evolving health care requirements, as well as the crucial challenges concerning low resource countries. The lectures and sessions will be provided by worldwide recognized experts in the field mentioned, representatives of universities, private practice, major hospitals and health care institutions from around the globe.

I do hope that you will enjoy the Congress and will stimulate a creative exchange of ideas and will be personally rewarding.

On behalf of the Organizing Committee, please accept my best wishes for this informative and enjoyable event.

Yours truly,

Dr Sergey Suchkov, MD, PhD

Director, Center for Personalized Medicine, Sechenov University and

Chair, Dept for Translational Medicine, Moscow Engineering Physical Institute (MEPhI), Russia

Member, New York Academy of Sciences, USA

Secretary General, United Cultural Convention (UCC), Cambridge, UK
