

Welcome Message

Dear Colleagues and Friends,

With the latest development of science and technology, the advances in the science and technology of lasers, optics and photonics have also developed rapidly. We need to inspire novel/unique ideas and solve some challenging scientific and technical problems encountered for carrying out ongoing cutting-edge research, development and uses of lasers, optics and photonics. We have become more capable of dealing with these challenges/issues by using the latest science and technology in the area. We can also inspire every nook and corner research topic related to the advancement in the research and development in the fields of lasers, optics and photonics.

On behalf of the Conference Organizing Committee and Meetings International, it is my pleasure to invite all the international famous/leading scientists, outstanding researchers, academic people and industrialists from all over the world to attend the 3rd International Conference on Lasers, Optics and Photonics which is to be held in Dubai during December 02-03, 2019. We welcome you to join us and be a part of knowledge and views in respect to the theme "Unveiling the Recent Trends and Advancement of Lasers, Optics and Photonics".

This conference first started in 2018 and was held in Osaka, Japan, comprising of session introductions that spun around the topic "Integrating the Advances of Lasers and Optics in Modern life". We now take a step towards its 2nd edition known as Optics 2019 in the extremely beautiful city of Singapore, where the world-famous The Photonics Institute (TPI) of Nanyang Technological University (NTU) is situated, which is in conjunction with the University of Southampton.

Optics 2019 Dubai will provide a good platform for international academics, researchers, scientists, engineers and pioneering students working in the fields of lasers, optics and photonics to exchange, share and discuss their unique ideas, new knowledge and cutting-edge science, unveiling recent trends and advancement for accelerating scientific discoveries in the area, offering the opportunity to all delegates for networking, also globalizing the research by installing a dialogue between industries and academics for launching new technologies and applications.

We are looking forward to seeing you at this exciting event to meet with the international famous/leading scientists and outstanding researchers for sharing new and exciting ideas/results in Lasers, Optics and Photonics.

Best regards,

Houxiao Wang

Conference Chair
